MID-TERM ADDRESS
OF
HON. MATTHEW A. GLYNN
MAYOR OF NEW BEDFORD
TO THE CITY COUNCIL

Gentlemen of the City Council:

In January of last year, I, as the newly elected Mayor of New Bedford, delivered my inaugural address to you, who were then the newly elected members of the City Council.

A year has past since that occasion and we again convene at the commencement of the second year of our respective terms of office. Much has occurred since we assumed our duties as City Fathers, and so I feel that I may avail myself of no more favorable time than this to appear before this honorable body of legislators and to acquaint you with the past year's activities of the executive and administrative branch of our municipal government. Of course, you can appreciate that time will not permit me to give you a minute and detailed accounting. I shall therefore, attempt to give a brief resume of the accomplishments of the past year and a general outline of my aims and desires which I hope to effect during the present year.

In my inaugural address of a year ago, I assured you that I would not encroach upon the functions of your body and that on those occasions on which there were any questions of proper authority I would call upon you for your suggestions! This position I have steadfastly maintained, and although we have not always held the same opinion, the majority of this Council have availed themselves of an impartial and unselfish discussion in those matters that have been of vital importance to the well-being of our City.

My office has been, and always shall be, accessible to any of you gentlemen who wish to obtain any further information or suggestion that may be within my province.

During the past year it was my privilege and duty to make appointments to the several administrative branches of our government. In so doing I can sincerely say that every nomination was made for the best interests of the City, with the result that we now have as efficient and capable personnel as may be found throughout this Commonwealth.

Notwithstanding the fact that legislation was enacted during the previous administration which had to do with the advertising for bids for gasoline, truck hire and the establishment of the Emergency Relief Board, no effort was made to make these measures effective.

During my incumbency as Mayor, I employed the necessary means to enforce these enactments which had been dormant and inactive, so that discrimination and patronage have been completely eliminated.

The law enforcement duties of the Police Department have reverted to that department with the result that violations have been prosecuted impartially.

My request for your consideration of the establishment of a Purchasing Department for the City is receiving fullest cooperation. I readily appreciate that this matter is of vital importance and therefore requires an exhaustive study before final enactments are formulated. I feel confident that your honorable body will soon take the steps necessary to make this legislation effective.

The methods employed in the collection of garbage have been vastly improved upon, with the result that the number of complaints received in the past few months have been practically negligible.

The Water Department, which is of such immediate importance to health and welfare of the City, has been staffed by a capable and efficient personnel. With our Country at war, this department has taken every protective measure to insure not only the adequate supply of pure water but the assurance of freedom from contamination.

During the year 1941, approximately twenty new diversified industries have located their manufacturing plants in New Bedford. These companies now give employment to approximately 4000 people, and have thereby relieved the distress, of unemployment in this City. This improvement has manifested itself in the marked reduction of welfare expenditures.

Two of these new enterprises are at present in the process of rehabilitating, for their own particular purpose, buildings that were formerly used for the manufacture of textiles. These improvements are being rapidly consummated so that production may begin at once. When actual operations commence employment will be provided for 1500 to 2000 employees.

Although, most of these concerns are now actively engaged in the manufacturing of war defense materials, they are basically adapted for the production of merchandise suitable for peace time requirements and therefore will, when the present crisis is terminated, begin manufacturing those products for which they were fundamentally organized. This will be accomplished without loss of time or employment. The immediate advantage that our City has derived because of the establishment of these new industries, is a decided and definite increase in our weekly payroll.

Now, gentlemen, the WPA. — This matter has been no less a problem child for us than it has been for every other community in the Country. You no doubt appreciate that it was originally formulated by the Federal Government for the

purpose of relieving nation-wide unemployment. In the past year we have made definite progress in the handling of these projects and in the elimination of unnecessary expenditures. The sum total of the cost to the City, during 1941, was less than that of the previous year. A considerable portion of this saving was effected by the decrease in the cost of equipment hire. This saving was accomplished in spite of an added cost of approximately \$35,000.00 for bus transportation of WPA employees to and from Federal Defense Projects at Camp Edwards. This is the inauguration of a program of WPA Economy that I sincerely intend to continue during the present year.

These effected savings coupled with the decreased cost in other municipal departments enabled me to reduce the tax rate in 1941 and the continuance of this plan will be instrumental in the fulfillment of an anticipated further reduction in the tax rate for 1942. This 1941 decrease in taxes was accomplished without the necessity of increasing the assessed valuation of either real or personal property.

At the end of the first year of my administration, the financial condition of our City shows a substantial improvement in comparison with the close of the year 1940.

Bonded indebtedness reflects a net reduction of \$823,000.00, temporary revenue loans were reduced \$600,000.00 and tax title loans \$59,026.70. This is a total reduction of \$1,482,026.70 in loans and bonded indebtedness for the year 1941.

Notwithstanding this reduction in indebtedness, the City of New Bedford closed the fiscal year with the substantial cash balance of \$621,983.49.

I have directed much of my effort toward the elimination of suffering and distress among those of our people who, because of conditions beyond their control, have found it

necessary to seek assistance. In the advancement of this plan I have already put into effect the Hot Lunch Program for underprivileged children, made possible the extension of the Food Stamp Plan in this City so that it now includes those people who are classified in the low-income bracket, and have re-established the Free Dental Clinic which has been closed for several years. These innovations are but a part of the general welfare improvements that are in progress.

In my inaugural address I assured you that I would do everything within my power to restore to the municipal employees, as much of their pay cuts as would be practical. During the past year I attempted to have the State Emergency Finance Board approve of a restoration that would have become effective in 1941. However, in the preparation of the Budget for the current year, I have made provision for a 10 percent increase in the wages of the City employees and I feel very confident that I will, this time, be successful in obtaining authority to grant it.

To attempt, under present conditions, to set forth a definite program for 1942 would be folly, because, as you gentlemen know, since the declaration of war, the Federal Government appropriately established an "all out" defense program. It shall be our duty, as citizens of this great democracy, to cooperate fully and unreservedly in all defense measures. In doing so we must plan prudently as we go along. To date, we have established in this City a Civilian Defense Organization, a Defense Stamp and Bond Committee, and a Tire Rationing Board, all of which are now operating most efficiently and at a minimum cost.

The future development of these committees and others that will come into existence for the adequate protection of human lives and property will depend upon the cooperation they receive from us. We will be called upon, from time to time, to appropriate funds for the maintenance of these

bodies. Most of the functions of these committees are voluntary and gratuitous.

I deem this a most opportune time to express to them my sincere gratitude for the time and untiring effort they have so generously contributed.

Gentlemen, you may rest assured that you will have my wholehearted cooperation in carrying out those duties that we as elected directors of our City have had conferred upon us.

In conclusion, gentlemen, let me say, that while each and everyone of us will do our utmost to bring fullest success to our armed forces, we must realize that we are finite beings and are totally dependent upon Divine Providence. Our beloved Country, in union with our allies, is engaged in a war that means the life or death of people who desire that they live peacefully and friendly with all nations, both mighty and weak. We are resolved, that those conquered nations, so ignominiously cast into a state of serfdom, shall have a new birth of freedom. Let us entreat Almighty God that final success will come to the United States and her allies, so that peace, justice and good-will may be restored to a world now in the throes of sorrow and despair.

The tasks that will confront us during the current year will, in all probability, be complex and so as a final note may I wish this honorable body happiness and success in their every endeavor.

Thank you.

BOARD OF CEMETERY COMMISSIONERS

The Pump House at Pine Grove Cemetery, being of no further use, was ordered torn down.

During the past year there was much controversy about vandalism in the cemeteries, which occurred previous to 1941.

The following is quoted from the December 1941 issue of the "Cemetery Legal Compass", which is an authoritative on Cemetery Law:—

"Vandalism includes the tipping over of monuments, the destruction of shrubbery, and other acts of damaging to memorial and interment space.

We have been able to find but very little law on the liability of the cemetery to replace memorials or shrubbery that has been stolen, or to reset monuments that have been toppled over. Neither is there much on the duty of the interment organization to maintain adequate guards to protect its premises.

It would appear from what law we have been able to find that the cemetery is under no duty to maintain guards around the property or to replace broken or stolen memorials unless it has contracted to do so".

The employees in this department are constantly on the alert for vandals but vandalism usually occurs after working hours.

Respectfully submitted,

HAMMON L. WOLLISON,
Chairman

GILBERT L. FREITAS

DANIEL J. WRIGHT,
Secretary

SUPERINTENDENT'S REPORT

To the Board of Cemetery Commissioners:—

Gentlemen:—

I herewith submit my report of the work accomplished under my supervision during the year 1941, together with such recommendations as I think practicable for the coming year.

The office buildings at the Rural and Oak Grove Cemeteries were painted at a very small cost.

Water so badly deteriorated an inside corner of the greenhouse that it was necessary to repair it with new boards. Also a rusted smoke pipe was replaced with a new one. The greenhouse needs to be reputtied and painted and I suggest that this be done during 1942.

Altho we had only a small amount of welfare help in 1941 we managed to keep the plot of land in Rural Cemetery, which was developed by the W. P. A., in a presentable condition.

The wall at Pine Grove Cemetery which was started as a W. P. A. project, was stopped, leaving about one-third of it unfinished, and the project for avenues at Pine Grove Cemetery did not get started. Preparations were made to build a toolhouse when the work was stopped.

The following is a summary of general work done in 1941:—

CEMETERY BOARD

9f

SUMMARY OF WORK DONE IN 1941

	Rural	Oak Grove	Pine Grove
Sq. ft. land graded and seeded	7,800		
Lineal ft. borders trimmed		150	
Foundations for tablets and markers	89	79	43
Foundations for monuments	23	11	8
Foundations re-built		1	
Corner posts in lots	5		
Flower and shrub beds	22	37	10
Trees removed	27	8	9

SIDNEY B. DEMORANVILLE,

Superintendent of Cemeteries.

REPORT OF CARETAKER**OF SOLDIERS' AND SAILORS' GRAVES**

New Bedford, Mass.,

January 1, 1942.

To the Honorable City Council of the
City of New Bedford

Gentlemen:—

I herewith submit the following report of the work done on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:—

	Care of lots and Graves
Rural Cemetery	109
Oak Grove Cemetery	149
Pine Grove Cemetery	24 \$207. was expended
Peckham West Cemetery	10 for fitting graves in
Sacred Heart Cemetery	52 the different ceme-
Jewish Cemetery	14 teries.
Congregational Church Cemetery	2
	<hr/> 360

The amount appropriated for this work was \$1,800.00 and of this amount \$1,591.54 was expended for cutting grass and \$207.00 for fitting graves, making a total of \$1,798.54 and leaving a balance of \$1.46.

Respectfully submitted,

SIDNEY B. DEMORANVILLE,

Caretaker of Soldiers' and
Sailors' Graves

THE
Auditor's Annual Report

CITY OF NEW BEDFORD
MASSACHUSETTS

For the Fiscal Year Ended

December 31, 1941

THE A. E. COFFIN PRESS—PRINTERS
NEW BEDFORD, MASS.
1942

CITY OF NEW BEDFORD

OFFICE OF THE CITY AUDITOR

To the Honorable the City Council:

Submitted herewith are the following statements and schedules showing the receipts and expenditures for the City of New Bedford for the fiscal year ended December 31, 1941 and the financial condition at the close of the year.

Exhibit A—Balance Sheet as of December 31, 1941.

Exhibit B—Statement of Receipts for the Year Ended December 31, 1941.

Exhibit C—Statement of Expenditures for the Year Ended December 31, 1941.

Exhibit D—Summary of Receipts and Expenditures for the Year Ended December 31, 1941.

Exhibit E—Schedule of Temporary Revenue Loans Outstanding as of December 31, 1941.

Exhibit F—Schedule of Bonded Debt and Sinking Funds as of December 31, 1941.

Exhibit G—Schedule of Real Estate and Personal Property as of December 31, 1941.

Exhibit H—Schedule showing Indebtedness Payable at the close of the fiscal years 1921 through 1941.

Exhibit I—Summary of Bonded Debt and Sinking Funds as of December 31, 1941.

Exhibit J—Schedule showing year of maturity for Bonded Debt and Sinking Funds as of December 31, 1941.

Exhibit K—Comparative Balance Sheets as of December 31, 1940 and December 31, 1941.

My audit of Cash in Banks disclosed balances totaling \$636,108.81 at the close of the fiscal year ended December 31, 1941.

Taxes Receivable at the close of the year were \$597,-402.36 against \$1,003,806.61 on December 31, 1940, reflecting a decrease of \$406,404.25.

Tax Titles totaling \$545,017.42 show an increase of \$62,748.61 over the balance shown on December 31, 1940.

City Property which is listed in detail in Exhibit G, has been valued at \$32,129,439.51. This valuation shows a decrease of \$884,583.12 in comparison with the valuation placed on City Property at the close of the previous year. This decrease is due in a great measure to reductions made by the assessors and department officials in the valuation of real and personal property owned by the City at the close of the year.

Notes Payable for Temporary Revenue Loans were \$800,000.00 at the close of the past year, a decrease of \$600,000.00 in comparison with the beginning of the year.

On December 31, 1941 Bonded Debt Outstanding totaled \$6,760,000.00 against \$7,583,000.00 at the close of the previous year. This is a net reduction of \$823,000.00.

Exhibit H shows the Bonded Debt for the City of New Bedford for each year commencing in 1921 through 1941. At the close of the year 1923 bonded debt totaled \$14,440,000.00 the high point reached during the past twenty years and at the close of the year 1941 this indebtedness had been reduced to \$6,760,000.00.

Exhibit J sets forth the net amount payable yearly from revenue to provide for payments against bonded debt outstanding at the close of the year 1941. These requirements total \$1,142,000.00 for the fiscal year 1942 and show substantial decreases each year with the final payment liquidating all bonded debt during the year 1957.

Tax Title Notes outstanding at the close of the year amounted to \$102,546.21 against \$161,572.91 at the beginning of the year, reflecting a net reduction of \$59,026.70.

All receipts and expenditures for the fiscal year ended December 31, 1941 are shown in detail on Exhibits B and C.

The City of New Bedford closed the fiscal year 1941 with a surplus of \$2,251.37 in its Excess and Deficiency Account against a deficit of \$66,783.12 for the year 1940, a deficit of \$120,008.58 for the year 1939, a deficit of \$68,576.95 for the year 1938 and a deficit of \$203,754.93 for the year 1937.

I certify that in the course of my audit of the books and records of the City of New Bedford I verified cash on deposit and securities owned belonging to the sinking funds of the City of New Bedford and the several trust funds in the custody of the sinking fund commissioners, trustees and city treasurer, and find that the same is in agreement with reports and records rendered by said commissioners, trustees and city treasurer to the City Council.

Respectfully,

FRANCIS A. CONSIDINE,

City Auditor.

SUMMARY FOR 1941

Fees	\$12,711.88
Licenses	4,341.75
Dog Licenses (County)	8,757.00
Fish and Game Licenses (State)	4,102.50
	<hr/>
Total	\$29,913.13

TABLE OF RECEIPTS FOR LAST TEN YEARS

1932	\$23,086.69
1933	22,108.12
1934	21,888.69
1935	24,244.20
1936	25,127.53
1937	27,062.48
1938	25,464.10
1939	26,363.40
1940	29,852.45
1941	29,913.13

An increase in revenue reflects, in part, the increased duties performed by this office. The phrase "in part" has purposely been used because a great part of the extra work does not return any revenue to the city. You will note that the sum of \$1,072.20 was received for certified copies. This sum represents approximately 4,288 certified copies of vital statistic records. It does not include innumerable copies that are furnished to soldiers, sailors or marines for use in claims against the government, for which no charge can be made. Nor does it include abstracts that are furnished without charge, the total of which represents from eight to ten times the number of certified copies issued. It is also interesting to note that the returns from Beano licenses decreased \$1,013.00 in 1941 and the difference was made up in other matters.

OPERATING COSTS

Salaries and Wages	\$15,845.06
General Expenses	2,298.11
Outlay	80.32
	<hr/>
Total	\$18,223.49

Number of females under 18	64 (Increase of 17)
Youngest person married (female)	15 years
Oldest person married (male)	74 years

DEATH DATA — 1940

Total number of deaths recorded	1499
Deaths in New Bedford	
Males	692
Females	559
Stillbirths	47
	1298
Deaths of New Bedford residents reported from out of the city	201
Total	1499

Statistics of 1,251 deaths in New Bedford

Born in New Bedford	290
Born elsewhere in the United States	291
Born in Canada	168
Born in England	167
Born in Portugal	182
Born in all other foreign countries	152
Birthplace unknown	1

Of the 295 medical examiner's certificates of death 17 were deaths in which motor vehicles played a part; 4 were accidental gas poisoning cases; 4 were suicides from gas poisoning; and the remaining 270 were from other causes.

During the year 1941 our work in connection with vital statistics increased a hundred fold. While there was a decided increase in this branch of our work in 1940 it was nothing as compared with the requirements of 1941. The demands for proof of birth by agencies outside the federal government became more exacting as the nation prepared itself for the inevitable conflict that became a reality on December 7, 1941. Although parents have been required to notify the City Clerk of all births since the first recording act they have in many cases through inadvertence or neglect failed to do so. As a result many persons now well over fifty years of age are discovering for the first time that no record was ever made of their birth. Under certain circumstances the law allows a record to be made years after the event occurred, but since we must have rather conclusive proof of the facts alleged considerable time must be spent with the person involved either personally or through the medium of the mails. The same situation arises where a person claims that his record is erroneous in some particular. In many cases the only person who is in a position to take the required oath is confined by reason of infirmity or illness to their home or a hospital. In order to assist these people I have gone both to private homes and to the hospital on countless occasions. In this regard it might be noted that 67 delayed returns of birth were recorded in 1941 and 235 corrections made during the same period. Practically all employees of the office have at one time or another remained in the office as late as 5 o'clock to assist some person who was in difficulty. The Assistant City Clerk, Pauline C. Roberts, has been especially co-operative in these cases and hardly ever leaves before 4.30 o'clock and very often remains until 5 o'clock or later to accommodate the public. Prior to 1912 practically no effort was made to check on the information furnished by the doctor, midwife or canvasser. Since that time various methods have been used in an attempt to verify the facts before the record was made. Since January 1940 the parents have been requested to furnish

the same information as the doctor and we are thus able to make a comparison shortly after the birth and to straighten out any discrepancies immediately. Every means within our control is exhausted in order that we may, as far as it is humanly possible, record the correct facts relative to both child and parents. The members of my office force have exercised the utmost tact in dealing with persons whose births were never recorded or if recorded were claimed to be erroneous in some respect. While most of these persons were reasonable there were a number of exceptions to the general rule where considerable patience was required.

NUMBER OF BIRTHS, MARRIAGES AND DEATHS RECORDED IN NEW BEDFORD

CITY COUNCIL

Councillor George P. Ponte was elected President of the City Council for the year 1941. During the year the council held 20 regular meetings and 11 special meetings.

Before passing on the Mayor's Budget the council sat as a quasi committee of the whole for the purpose of questioning department heads, boards, etc. as to their actual financial requirements for the current year.

An ordinance regulating the use of sound trucks and prohibiting certain types of obnoxious and noisy advertising was adopted on June 12, 1941.

An ordinance relative to Special Police Officers was passed to be ordained on September 11, 1941.

Considerable time and attention was given to traffic matters and a number of ordinances adopted in an effort to remedy certain bothersome situations.

On July 24, 1941 the City Council adopted an order dividing Ward One (State lines) into 11 precincts. This was necessary because certain precincts were in excess of the 2,000 voters allowed by law.

On August 28, 1941 the City Council adopted an order dividing Wards One and Two (Municipal lines) so as to conform with the precinct set up under the State lines.

GENERAL

By virtue of Chapter 473 of the Acts of 1941 the budget law applicable to the several cities in the commonwealth was revised.

Chapter 432 of the Acts of 1941 changed the method of appointing precinct officers.

Chapters 601 and 697 of the Acts of 1941 provided that a blood test should be made prior to the filing of marriage intentions.

Chapter 270 of the Acts of 1941 amended the marriage laws so that out of state minors are now required to have the consent of their parent or guardian.

The above are merely some of the new laws that affect the work of this office.

The approach of war, the movement of troops and the actual presence of war has had its effect on this office, particularly in so far as marriage intentions are concerned. Young men in the armed service have had to take whatever time was available to them to file their intentions, the net result of which has been telephone calls to my home at all hours and visits to the office evenings, Sundays, holidays and before regular office hours as well as after regular office hours in the afternoon. The entire office force has gone out of its way to assist young couples who have found themselves caught in the maze of military orders and regulations. For their unselfishness and wholehearted cooperation I desire to express my gratitude to my office staff.

The audit of the accounts of the City of New Bedford for the year ending December 31, 1940 made by the Director of Accounts of the Department of Corporations and Taxation was submitted to the city council on September 11, 1941 and is on file in the records of the city council meeting of that date. This report may be seen at the city clerk's office upon request.

Very truly yours,

CHARLES W. DEASY,

City Clerk

ANNUAL REPORT
OF
CITY SOLICITOR

NEW BEDFORD,
MASSACHUSETTS

TO CITY COUNCIL

BRADBURY-WARING, INC.
1941

January 31, 1942

TO THE HONORABLE CITY COUNCIL:

Gentlemen:

I am submitting herewith my annual report in accordance with Section 47 of the Revised Ordinances of 1916 as of the end of the fiscal year December 31, 1941.

The many and varied duties of this office involve the approval of most all written instruments of any legal purport including all contracts of municipal departments, written agreements of any nature, the preparation of legal documents necessary for any municipal purpose including the execution of options, leases, mortgages and deeds of conveyance. It is our duty also to try all law suits against the city before Masters, Auditors and the various tribunals of law,—including bills in equity and other extraordinary proceedings.

Many conferences are held daily with the different department heads involving the rendition of many written legal opinions,—including conferences and opinions rendered to members of the city council and to its duly appointed committees. Conferences with the W. P. A. officials are again on the incline and agreements relative to W. P. A. matters are of a highly specialized and technical nature usually involving much detailed work and consideration.

Of course it is impossible to anticipate the amount of litigation which will confront the law department of a municipality of this size during the next fiscal year and all our appropriations and expenditures are entirely a matter of conjecture. It is possible in the expense of prolonged and protracted litigation that our entire appropriation for the fiscal management of this department for the entire year may be exhausted in a very short time. Every attempt is made to operate the department upon an economical basis and to keep within our budgetary allocations and I think a comparison will disclose that this department turned back out of its 1941 budget appropriation more money proportionately than any other department of the City of New Bedford.

January 22, 1942

**REPORT OF THE
COMMISSIONERS OF THE
SINKING FUNDS**

City of New Bedford,
December 31, 1941.

To the City Council of the City of New Bedford:

Gentlemen:

At a meeting of the Commissioners of the Sinking Funds of the City of New Bedford held this date.

It was voted:—To adopt the foregoing statements of the Treasurer of the Sinking Funds of the City of New Bedford required by the Statutes of the Commonwealth of Massachusetts to be made annually to the City Council.

Yours respectfully,

WILLIAM J. BRENNAN,

REPORT

December 31, 1941.

Hon. Matthew A. Glynn, Mayor

Dear Sir:

I have the honor to submit, herewith, my thirty-eighth annual report of the conditions and operations of the fire department for the year 1941.

The department answered 362 Box alarms and 840 Still or Telephone alarms, a total of 1202 calls during the year.

There are eleven Brick Stations and one frame building in the custody of this department.

The Fire Prevention Bureau made numerous inspections during the year and corrected many fire hazards.

Over 9,000 periodic inspections were made by firemen under the direction of District Chiefs throughout the year.

APPARATUS IN COMMISSION

- 8 Motor Pumping Engines.
- 4 Electric Aerial Trucks.
- 1 City Service Truck.
- 3 Hose Wagons with Booster Equipment.
- 1 Foam Chemical.
- 5 Automobiles for Chief and Assistants.
- 1 Automobile for Fire Prevention Bureau.
- 1 Supply Truck for Repair Force.
- 1 Wrecking Car for Repair Force.
- 1 Supply Truck for Fire Alarm Bureau.

APPARATUS IN RESERVE

- 200 feet of ⅝ inch.
- 127 waterproof covers carried on apparatus.

DEATHS

Thomas F. McCauley, Hoseman, Engine Co. No. 1, joined the department Sept. 2, 1917, pensioned Nov. 1, 1940, died Jan. 7, 1941.

Joseph A. Mahoney, Ladderman, Truck Co. No. 5, joined the department May 9, 1905, died Oct. 19, 1941.

RECOMMENDATIONS

I recommend the purchase of 1000 feet of hose; four new automobiles for Chief and District Chiefs, equipped with two way radio transmitters; 1 Hose wagon with Booster equipment, and 1 Inhalator for Hose No. 2.

Respectfully submitted,

EDWARD F. DAHILL,

EFD/FTM

Chief of Department.

New Bedford, Mass., March 26, 1942*

*To His Honor, the Mayor and
Gentlemen of the City Council:*

Pursuant to provisions of Section 28 Chapter 111 (Ter. Edition) of the General Laws, we herewith present to your honorable body the report of the activities of this department for the year ending December 31, 1941.

Respectfully submitted,

Arthur J. Taveira, M. D.
Chairman,

Joseph Eccleston,

James P. McCrohan,

Board of Health

REPORT OF AGENT AND MEDICAL OFFICER

The maintenance of adequate health is of vital importance if we, as civilians, are to be able to do our part successfully during this trying period. It is, therefore, with some comfort that we notice that our standard of general health, as a whole, is of the best. The general adjusted mortality rate of 10.4 and the infant mortality rate of 37.3 are next to the lowest ever recorded in our city.

Taken all in all, it was a very satisfactory year from a public health point of view. Except for a small flare-up of Poliomyelitis (twenty-three cases, five of which were from out of town) no serious outbreak of any communicable disease occurred.

For the first time, it can be reported that our Isolation Hospital has remained unoccupied during the year. In one way, that is gratifying since it shows that the need for hospitalization did not exist and that, therefore, the incidence of communicable diseases was small.

A better coverage in the inspection of food handling and fish filleting establishments was done due to the fact that two sanitary inspectors were added to this department.

The greatest number of deaths was between the ages of 70 and 75.

Tuberculosis showed a slight decrease in number of cases reported. This, as in the past, is our most pressing problem. It would be a great help in case finding and follow-up work if we had a nurse whose whole time was devoted to this kind of work.

A. N. SENESAC, M. D.,

Agent and Medical Officer.

INFANT MORTALITY

The following record is interesting to those who are engaged in infant welfare work.

Year	Under 1 month	Year	Under 1 month
1927	98	1935	57
1928	96	1936	61
1929	62	1937	52
1930	64	1938	51
1931	90	1939	32
1932	52	1940	54
1933	58	1941	34
1934	70		

The infant mortality rate for the same period follows:

Year	Rate	Year	Rate
1927	66.	1935	55.8
1928	78.	1936	59.1
1929	65.	1937	46.5
1930	53.72	1938	49.3
1931	84.27	1939	34.19
1932	55.5	1940	41.28
1933	55.8	1941	37.3
1934	62.

REPORT OF INSPECTOR OF MILK, PROVISIONS
AND SLAUGHTERING

New Bedford, January 30, 1942

To the Board of Health :

Gentlemen :

I herewith submit my report for the year ending December 31, 1941 :

All the cows within the city limits were inspected and there were no reactors to tuberculosis tests.

Numerous inspections of bakeries, markets, stores, restaurants, lunch carts, soda fountains, hotel kitchens and cold storage plants were made during the year. In many cases, foodstuffs were condemned and corrections ordered.

All bottling plants and linguica or sausage manufacturing plants were inspected and corrections needed were made before a license was granted.

Frequent inspections were made of premises where fowl were slaughtered.

There were no positive cases of Rabies in the city during the year.

Respectfully submitted,

WM. J. O'CONNOR, V. M. D.

Inspector of Milk, Provisions
and Slaughtering.

REPORT OF THE NEW BEDFORD COOPERATING
CLINIC

New Bedford, January 1, 1942

To the Board of Health:

I hereby submit my report as Chief of the New Bedford Cooperating Clinic for the year ending December 31, 1941.

Number of patients examined	1,069
Number of new patients	435
New admissions Syphilis	92
New admissions Gonorrhea	103
Readmissions	26
Number of patients discharged:	
Probably cured	105
Transferred to other care	83
Non-infected	170
Number of visits for treatment and advice	13,260
Number of arsenical treatments	2,974
Number of blood tests	527
Number of smears for Gonococcus	389

Respectfully submitted,

W. W. NELSON, M. D.,

Chief

REPORT OF OCULIST

New Bedford, January 20, 1942

To the Board of Health:

I herewith submit my report as oculist for the year ending December 31, 1941:

	Cases	Visits
Simple Conjunctivitis	87	87
Suppurative Conjunctivitis	18	89
Ophthalmia Neonatorum	7	47
Chemical Burns	3	3
Congenital Atresia	2	2
No Disease	3	3
Total	120	231

Respectfully submitted,

A. L. BRUNELLE, M. D.,

Oculist.

REPORT OF THE BACTERIOLOGIST

New Bedford, March 24, 1942.

To the Board of Health:

Gentlemen:

I herewith submit my report for the year ending December 31, 1941:

Diphtheria:

Whole number of cultures examined	24
Whole number of cultures positive	0
Whole number of cultures negative	23
Whole number of cultures unsatisfactory	1

Pulmonary T. B.

Whole number of specimens examined	146
Whole number of specimens positive	13
Whole number of specimens negative	115
Whole number of specimens unsatisfactory	18

Gonococcus:

Whole number	37
--------------	----

Respectfully submitted,

HAROLD E. PERRY, M. D.,

Bacteriologist

REPORT OF T. B. CLINIC

New Bedford, March 24, 1942.

To the Board of Health:

Gentlemen:

I herewith submit my annual report as Chief of the T. B. Clinic for the year 1941:

Number of Patients examined	1691
Number Re-examinations	1390
Number of new Pulmonary Cases	44
Number of Suspicious Cases	69
Number New Cases at Clinic	301
Not Tuberculosis	48
Number of T. B. Glands	4
Sanatorium Treatment Advised	80
X-Rays	615
Lamp Treatment	1

Report of School Clinic for 1941:

Number enrolled in Public Schools	3727
Number tested in Public Schools	2168
Number X-rayed in Public Schools	933
Number enrolled in Parochial Schools	670
Number tested in Parochial Schools	534
Number X-rayed in Parochial Schools	309

Respectfully submitted,

JAS. F. BREWER, M. D.,

Chief of Clinic.

REPORT OF INSPECTOR OF PLUMBING

New Bedford, February 2, 1942

To the Board of Health:

The following is my report for the year ending December 31, 1941:

Inspections of Plumbing	5718
Inspections of domestic Hot Water Heating and Storing Devices	715
Investigation of complaints resulting from nuisances created by insanitary conditions	101

Respectfully submitted,

ERNEST G. PARKER,

Plumbing Inspector

REPORT OF DENTAL CLINIC

New Bedford, March 1, 1942

To the Board of Health:

I herewith submit the report of the Dental Clinic for the year ending December 31, 1941.

This work began with the opening of the school year in September and is confined to children in the first, second, third and fourth grades of the Public and Parochial schools. The restorative work, i. e., fillings and prophylaxis treatments, is limited to the third grades. All children in the first four grades are treated for the relief of pain.

The following services were rendered:

770	Amalgam Fillings
137	Copper Amalgam Fillings
86	Cement Fillings
55	Zinc Oxide Fillings
97	Cement linings for fillings
15	Zinc Oxide linings for fillings
23	Miscellaneous treatments
23	Howe Silver Nitrate treatments
365	Temporary teeth extracted
90	permanent molars extracted
236	Phophylaxis treatments
<hr/>	
1897	Total of all services
464	Total number of patients

Respectfully submitted,

F. J. HOYE, D. M. D.

REPORT OF SUPERINTENDENT OF GARBAGE PLANT

March 24, 1942

To the Board of Health:

Gentlemen:

I herewith submit my report for twelve months ending December 31, 1941:

Total amount of Garbage and Rubbish received and incinerated — 21,448 tons.

Respectfully submitted,

A. M. THRESHER,

Supt. Garbage Disposal.

ANNUAL REPORT
OF THE
INSPECTOR OF WIRES
POLICE SIGNAL SYSTEM
STREET LIGHTS

TO THE CITY COUNCIL

For the Year 1941

American Press, Printers

1942

ANNUAL REPORT

New Bedford, Massachusetts

January 30, 1942.

To His Honor the Mayor and City Council
of the City of New Bedford:

Gentlemen:

I respectfully submit my report of the Inspector of Wires Department, Police Signal System and Street Light Department from December 31, 1940 to December 31, 1941.

INSPECTOR OF WIRES

The following gives a breakdown of the work accomplished this year.

Requests for inspections, 3,512; wiring new buildings, 109; wiring old buildings, 134; additions and alterations, 10,251; repairing defects, 605; oil burners, 352; signs, 257; advisory, 334; temporary work, 38; gas pumps, 98; ice cream cabinets, 17; gas burners and thermostats, 29; Gas Co. recps., 204; fixtures 6,610; change-overs, 113; fluorescent lamps, 1,390; 110V motors, 638; 220V motors, 351; 550V motors, 229, permits sent to contractors and owners, 495; receptacles, 4,549; transformers, 295; telephone booths, 1; inspections made, 9,278; reports of defective wiring sent to contractors and property owners, 3,351; certificates on rough work, 2,374; permits to connect electric services issued to the N. B. Gas & Edison Light Co., 2,944.

The year 1941 showed an approximate $33\frac{1}{3}\%$ increase in the installation of fluorescent fixtures.

Effective as of September 1, 1941, all fluorescent fixtures installed in New Bedford must bear the Manufacturer's name and an Underwriters' label.

This ruling has practically eliminated inferior fixtures being sold to the public and has been beneficial to all.

During the year I investigated and reported to the City Council on 151 petitions of wire using companies, involving 150 poles and 49 conduit petitions.

I also investigated 14 applications for the moving of buildings.

POLICE SIGNAL SYSTEM

A number of poles have been replaced in various parts of the city requiring the changing of line construction on forty poles. There have been nineteen other line jobs completed which involved placing of new cross arms or wires and cable changes. Line changes have been made in the north section of the city where new line construction has been built in a more favorable location for a distance of 2,470 feet. This work permitted the removal of 3,350 feet of overhead line, a portion of which extended through trees which caused a bad line condition. Overhead line was rebuilt in the south section of the city for a distance of 1,600 feet.

The pole replacements during the year also required resetting of four police boxes on new poles. Two of the boxes have been relocated, one with iron pedestal underground connection and one placed on a different pole connected aerially. A total of one hundred and fifty box inspections have been made and thirty-seven boxes have been repaired. Seven of the boxes have been removed from locations and entirely reconditioned with a spare box substituted while this work was in progress.

As the work on the Municipal Airport progressed it was found necessary to remove aerial lines from the ends of one of the runways and as both Police and Fire Dept. lines were involved in Plainville Rd., a special appropriation was granted and the work of laying underground conduit and cable was undertaken and completed with subsequent removal of nine hundred feet of overhead line.

Other cable repairs throughout the city required testing and resplicing on seven different occasions. Work on station equipment included installation of two new sets of storage batteries at Station 5, and twenty-two other repairs to defective equipment.

Incidental work included the removal of caution lights at the Hawthorn and Cottage St. intersection.

There are ninety-one boxes connected on two Police desks, one at Police Headquarters and one at Police Station 5, with electrical connections for flashing Fire Alarm lights at each station.

STREET LIGHTS

Listed below is a summary of the street lights now in operation.

100 C. P.	O. H.	2,152
250 C. P.	O. H.	838
250 C. P.	U. G.	1,103
400 C. P.	O. H.	36
400 C. P.	U. G.	253
600 C. P.	U. G.	82

Respectfully submitted,

JAMES E. MURPHY,

Inspector of Wires,
Supt. of Street Lights,
Supt. of Police Signal System

ANNUAL REPORT

Inspector of Wires, Superintendent of Police Signal System
and Superintendent of Street Lights.

IN CITY COUNCIL, February 12, 1942

Referred to Councillor Moriarty for study and report.

CHARLES W. DEASY, City Clerk.

IN CITY COUNCIL, April 23, 1942

Received, placed on file and ordered printed in the City
Documents.

CHARLES W. DEASY, City Clerk.

Attest:

CHARLES W. DEASY, City Clerk.

Trustees' Report

*To the Honorable, the City Council of the City of New Bedford,
Mass.*

The Trustees present their Eighty-ninth Annual Report to the City Council in the Report of the Librarian, which has been adopted by the Board.

Respectfully submitted,

BOARD OF TRUSTEES,

WILLIAM T. O'ROURKE,

Clerk of the Board.

LIBRARIAN'S REPORT

To the Trustees of the Free Public Library:

I herewith submit the Eighty-ninth Annual Report of the Free Public Library of New Bedford.

In attempting to measure the values of a public library in any community we must keep in mind that general figures of book circulation and reference service are poor criteria. It is therefore unfortunate that in the past, we as librarians have educated the public to use these inadequate measuring sticks to gauge the value of our usefulness. The number of books circulated is not the important item that it may seem. Rather is it significant to ask — What type of book is being circulated? How many members of the community use the library? For what purposes do they use the library?

As a means toward a better understanding of our work and results, which at best are still most intangible, I shall try to analyze our circulation and registration figures for the past year in the light of normal assumptions. That is, we must assume that the books we circulate are read, and that the reference questions we answer are for the obvious purposes.

That the public library has the rich potentialities for giving valuable aid both cultural, educational and recreational to persons of all races, creeds and colors, young and old alike, is an undebatable fact. That the public library succeeds in providing this aid is another question, which incidentally, is not peculiar to New Bedford alone. It is our own responsibility if the public is not aware of what we have. It is our job to let the public know what our stock is. A public library is a business and we must use business methods in all respects if we wish to obtain maximum results. At the end of this report I shall list a number of recommendations, among them several suggested avenues of approach to the problem of informing the community as to what we are doing, what we can and should do, and what we have to offer.

CIRCULATION DEPARTMENT

The total circulation of books for 1941 was 458,456, a decrease of about 23% in comparison with 1940 figures. The losses that began to appear in the latter months of 1940 continued throughout 1941, every month without exception. The ratio of loss in non-fiction circulation was lower than for fiction, but on the whole all departments and types of books showed losses of 20 to 25 percent. The countrywide drop in library book circulation is rightly attributed to increased employment, and this holds true also in New Bedford. However, in considering that the per capita circulation here in 1941 was only 4.2 books and in 1940 was only 5.4 books, both figures being far short of the 7-8 per capita we should reach, other causes for the low figure must be ascertained. In view of the quite respectable figure of 21 circulations per registered borrower, it would appear that our largest decrease was the result of losing a number of borrowers. Our registration fell from 24,611 in 1940 to 22,083 in 1941, the loss due in some part no doubt to reemployment and military service. In all likelihood however, the loss of the great majority of these borrowers finds its cause in the fact that we are unable to supply, with our severely limited funds, certain books and extra copies of books that are needed and wanted. If a person continually finds that he cannot get what he wants at the library because it is not available at all, or is available only in such a meagre quantity that he will have to wait many weeks for it, he naturally loses interest and goes elsewhere. It is clearly evident by comparison of our book expenditures with those of libraries in cities of similar size and circumstances that we have only about half the budget we should have for adequate book service to the community. In 1940 about \$6200 was spent for general books — in 1941 about \$5900, exclusive of the \$3000 from the Tripp Fund which was used for the school collection. These expenditures are approximately 50% below the average for other cities, and until sufficient funds are available we may be sure our circulation per capita figures will be proportionately low. If our \$10,000 annual income from Trust Funds were

available exclusively for general books, as it should be, our problem would be partly solved. In contrast however, in 1941 we had only \$5900 of this \$10,000 while the remainder went for binding, periodicals and general expenses. Under another section of this report entitled FINANCES AND PERSONNEL, I shall try to outline more completely our whole financial structure so that a better understanding of various matters in relation to one another may be obtained.

In further analyzing the circulation figures we find that our only gains were in general non-fiction at West Branch and total circulation at the Junior High Schools. The lowest comparative decreases were in the fields of religion, useful arts and history and for this at least we must be grateful.

In the belief that a public library's primary objective is cultural, educational and informational and that the recreational purpose is secondary, we have, during the past year, increased the ratio of non-fiction purchases and decreased the fiction in proportion. Then, too, it has been necessary to add more technical and semi-technical books because of demands by those engaged in national defense work, and late in the year we purchased a great amount of material along civilian defense lines. Naturally, non-fiction does not circulate to the same extent as fiction, in fact the ratio would probably be 3 or 4 to 1 in favor of fiction, but fiction, bought in large quantities, at the neglect of non-fiction, will not be conducive to a substantial working library.

The number of registered borrowers, 22,083, is especially low in view of the 1392 non-residents included in this figure. In addition to the registered borrowers, there are of course several thousand who use the library regularly for reading and reference and who must be regarded as patrons even though they do not have library cards. It might be worth while to consider the working out of a plan to learn just how many of these non-registered users of the library there are.

REFERENCE DEPARTMENT

"What is Gandhi's diet?" With this question the Reference Room was given its start for 1941. This was followed by hundreds of other questions and problems of a wide variety, including such subjects as speechmaking, picture exhibits, the Franklin stove, recipes, buttons, Hawaiian Islands, the Philippines, the Burma Road, Island of Trinidad, care of horses, honey as a substitute for sugar, sheet metal work, welding and machine shop practice.

In April a system of recording questions, their type, whether asked by student or other adult, and whether the library has material on the subject or not was put into effect. In this way we are able to bend our efforts in the direction of demands and requirements.

In March the Moody Investment Service was replaced by that of the Standard Corporation at a substantial saving. At first, some difficulty was found by patrons with the new service but by summer time it was remarked that "the Standard is better."

One of the more important pieces of work completed was a list of historical novels compiled for the State Historian of the Daughters of the American Revolution for the use of members of this organization.

An interesting problem was concerned with research into whaling logs for information sought by a man who wrote from Australia. In this and other questions concerned with whaling Mr. William Tripp, Curator of the Old Dartmouth Historical Society has been most generous with his help.

Among the reference tools added during the year, the following may be mentioned as most important: The Labor Relations Reporter, the Wage and Hour Reporter, Facts on File, and World News of the Week Map Service.

There were 8,213 questions, including those by telephone, handled by the reference librarians during the year. Of these, 1109 were for students, showing, in some measure, the educational activities of the department.

With the magazine racks located in the Reference Room, the handling of reference work is quite difficult because many of the books must be kept in the stacks. It is planned in 1942 to interchange Reference and Ingraham Hall, so that more shelf space will be immediately available for reference books, and the magazines will be in the general reading and open shelf room where they belong.

JUVENILE DEPARTMENT

The circulation of juvenile books at the main library was 47,237, of which 34,669 were fiction and 12,568 were non-fiction. This figure represents a loss of 16,500 in comparison with the total for the previous year, and in all likelihood the decrease may be ascribed to the same reasons as the general circulation loss. We are convinced that a sufficient amount of money for children's books would result in greatly improved service and results. In line with the conditions in all departments, the work with children is being performed well with about one-half of the money that should be available.

The circulation of books to the schools, also a responsibility of the Juvenile Department, shows a figure of 99,283, which represents a loss of 28,822 on the 1940 basis.

During the summer a large number of the books in the school collection were discarded and replaced by new copies and new titles purchased from the Clara L. Tripp Fund. More of this should be done in 1942 if we wish to keep the collection in good physical condition. It is also suggested by the Children's Librarian that the school service be extended to more of the parochial schools.

Other activities in which the Children's Librarian and her assistants engaged themselves during the year were: Boy Scout reading examinations, addresses to ten organizations, instructions on the use of the card catalogue, encyclopedias and the library in general to school children, both public and parochial, supervising a successful Vacation Reading Club in the summer

that numbered 227 members, arranging an attractive display for Book Week, and sponsoring the appearance of Mr. Thomas C. Curtis, the Book Explorer, on December 12, on which occasion 650 school children were brought to the library.

We cannot be too generous with funds for the Juvenile Department because it must be remembered that our juvenile borrowers of today will be our adult patrons of tomorrow. Our results with future adult clientel will be a reflection of our service to the children who use the library now.

CATALOGUE DEPARTMENT

A number of changes were made during the last twelve months in the department's routine resulting in a more efficient flow of work and books. A total of 8093 books were added to the library collection in 1941, an increase of about 2300 in comparison with 1940, but all of this increase and more was in books for the school collection. The number of volumes discarded or withdrawn was 3226 leaving us with a total book collection of 220,286 as of January 1, 1942. One of the problems that must be worked out in the near future in conjunction with the Catalogue Department is that of a complete inventory. There are many cards in our public catalogue for books that are no longer in our possession and have not been for some time. Thus the catalogue is frequently misleading and inconvenient, especially when a patron asks for a book that is no longer in the library, but for which there still are cards in the catalogue. A satisfactory inventory is a difficult piece of work and should be done periodically, for example, all the fiction in 1942, all non-fiction in 1944, all fiction again in 1946 and so forth. The fiction inventory would probably take a week's time or more, if done during the summer with no circulation of books allowed during the inventory period. Of course, the library would remain open for reading and reference. If the inventory is attempted while circulation goes on at a normal rate, the process will consume possibly several months, will not be reliable, and will seriously interfere with the classification and cataloging of books.

ART DEPARTMENT

In her report, the Head of the Art Department points out that "Blue print reading and drafting are subjects in constant demand and much interest is manifested in all the books on outdoor living, photography, interior decoration and antiques of every description."

From the musical angle, questions have ranged from American Indian music to Gregorian chant.

On Library Day we had the opportunity to bring to the attention of several newcomers the artistic treasures of this department and their enthusiasm was most gratifying.

There were 10 pictures purchased during 1941 and 1382 added from clippings, bringing the total collection to 77,895. The circulation of pictures reached a total of some 27,000.

A series of vertical steel files for the picture collection is most desirable and necessary for better handling and service, and it is hoped that we may be able to procure this arrangement, at least little by little, as soon as possible.

GENEALOGY DEPARTMENT

The ordinary work of this department was continued at a normal rate with the filing of cards for items of local interest, mounting of pictures in scrapbooks, indexing of scrapbooks, filing of cards for American Genealogical Card Index, and answering inquiries from near and far on genealogical subjects. The usual steady visits of New Bedford residents and others working on genealogy and history has continued unabated. Flag books have been particularly popular of late and histories of New Bedford are in constant demand.

Among the genealogical material added was Vital Records of New Bedford, volume 3, including deaths to the year 1850.

When the Boston Transcript discontinued publication in the late spring, we entered a subscription for the Hartford

Times, Saturday edition, which carries a genealogy section. Thus the work begun with the Transcript is being continued with the Times material.

The American Genealogical Index mentioned previously, which has been issued in card form for the last four or five years, and the object of which is to provide a much-needed comprehensive index of genealogies, is to be published in loose-leaf book form in the future. The editors feel it will be less expensive and more adaptable in the new form.

STACK DEPARTMENT

Some improvement has been noticed in the physical condition of the stacks since an immediate supervisor of this division of the library was designated, but a great deal more needs to be done. Evidently, the side aisles of the stacks, especially on the basement level, have been used as storage space for almost anything, including old books, newspapers and magazines, broken furniture, empty boxes and cartons and old book cases. Much clearing of space and weeding of shelves is necessary, and it is hoped that the job can be done gradually, at least. There are many worn and out-dated books taking up space on the shelves, as well as hundreds of old magazines that have outlived their usefulness. Possibly inventory time would be the best opportunity for this work. There is a chance that some of the magazines may be exchanged or sold through the H. W. Wilson Company clearing house for material of this kind.

PUBLIC RELATIONS

Probably the outstanding event in the field of publicity was "Library Day Open House," held on November 25th. The public and members of the city government were invited by letter, newspaper and radio, to visit the library and see its workings from the inside. Several club groups and many individuals were taken on conducted tours throughout the building. Attractive displays were set up showing the ac-

tivities of the several departments, and among the books exhibited were the Portuguese volumes purchased from the proceeds of the Portuguese films. It is hoped that Library Day may be extended to a Library Week in 1942, during which a full day will be given over to publicizing the work of each of the several departments and branches.

An attractive display of some of the library's garden books was arranged amid appropriate surroundings at the Garden Club show in Buttonwood Park.

Throughout the year a variety of exhibits of books and pictures was presented in the glass case on the third floor. One of the most interesting of these was a collection of autographs loaned by Miss Agnes Storer of Newport, Rhode Island.

Members of the community and library staff contributed to the annual Book Review Series which loses nothing in popularity from year to year.

Lists of timely books have been inserted in the Business and Professional Woman's Club Bulletin and the weekly list of new books has been published in the Standard-Times.

Our printed Bulletin has been issued regularly with lists of new additions as well as book reviews, articles, and notes contributed by members of the staff.

An interesting exhibit of whaling and early New Bedford material was arranged for the visit of a group of librarians, who came here after the American Library Association Conference at Boston in June, and the library, in the persons of the Trustees and Staff, was host at an enjoyable tea hour in the Trustees' Room.

A continued high degree of cooperation was extended the library throughout the year by the Standard-Times, Morning Mercury and radio Station W N B H, whenever there was anything we wished to bring to the public's attention.

In the recommendations at the end of this report I shall number several means of more effective and widespread pub-

licizing of library affairs that will give the city a better opportunity to understand our organization and objectives.

BRANCH LIBRARIES

Circulation at the Branches fell off at about the same ratio as it did at the Main Library, and in all likelihood for the same reasons. This loss was true of juvenile as well as adult books, although at West Branch a small increase was achieved in adult non-fiction circulation.

A number of repairs and other physical improvements should be made at the Branches as soon as possible, but in the case of North and West Branches, both located in exceptionally poor physical buildings as far as library purposes go, apparently we will have to wait for the Public Works Relief program now being organized. We have already submitted a request for the consideration of new branch buildings, North and West, as part of this program. At South we have an entirely different situation because we are located in a regular branch library building. For this reason some attention must be given to such items as painting or cleaning the walls, repairing plaster, replacing cracked light fixtures, and improving the outside appearances, possibly by planting some grass seed at the front.

HOSPITAL SERVICE

The circulation at St. Luke's Hospital dropped more than 50%, mainly because money was not available for purchasing new books. Other contributing causes of this decrease were a suspension of the service for a short time due to circumstances beyond our control, and disinterest on the part of hospital patients. It should be pointed out that we lose far too many books in this service, many more than the average allows. For this reason I believe that a reorganization of the entire plan, with cooperation from hospital authorities, is necessary. With this reorganization, it is planned to open up a wider service, including all hospitals and rest homes in the city, and developing a book delivery service to invalids in their own homes.

FINANCES AND PERSONNEL

As every successful business must have a sound financial structure, it is appropriate that the public library, which spends some of the taxpayers' money, look to its income and analyze its expenditures at least once a year so that all of us may know what we put in to what we are getting.

Salaries and wages, our largest item of expense, ran to approximately \$49,000 in 1941, all of which was provided by the municipal appropriation. In 1942, with the proposed increase of 10% for all city employees, this figure will reach the neighborhood of \$55,000, which, looking at it as a total, is quite respectable. It must be remembered however, that even with this goodly amount, an overwhelming majority of our employees will still be under a salary reduction as high as 10% in some instances with the largest grouping at about 7½%. It is true that the total amount to be expended for salaries and wages is fairly satisfactory, but the money is not well distributed. During the past year we have made some progress toward a more equitable distribution, based on the responsibility and importance of the work involved in various positions. In 1942 there will be opportunity for further adjustments along these lines, and in the following years it is expected that the program may be completed piece by piece.

A year ago we had three persons working a 40 hour week for \$10, \$9, and \$8 respectively, and part-time employees working for as little as .15 to .20 per hour in some instances. These conditions have been corrected to an extent with the combining of two of the full-time positions into one at \$16 per week, raising the third position to \$10 per week, and increasing the hourly wages of part-time employees to .25—.30 per hour, without any supplementary appropriation. In addition to this, two department heads received salary adjustments to bring them in line with all other department heads' salaries. The situation in the case of all the low-salaried personnel is still unsatisfactory, but will be improved gradually as opportunity for adjustments and increases permits.

Members of the full-time staff went on a 35-hour, 5 day week in the summer as an experiment, and because of the good results shown it was adopted as a permanent schedule in the fall.

In keeping with the schedules maintained at the Municipal Building, the janitors and elevator men were given a 40-hour, 5 day week in the fall, as a change from the 48-hour, 6 day week that had been in effect.

An unusual situation exists with respect to our building force in that no one of the janitors has ever received any more in weekly wages than the other two, and for that reason we have never had, in fact, a head janitor to whom the other seven members of the building force were responsible. At present, the janitor whose service extends the longest is acting as head, but is receiving no remuneration for his extra responsibilities. This situation should be corrected as soon as possible in the interests of justice and morale.*

The wage basis under which our janitresses work is also a matter for consideration. Their hourly wage has been .34. With the 10% municipal increase it will be .37½. This is several cents less than that to be received by school department janitresses, and more than .10 per hour less than that for municipal building janitresses. In view of the fact that all do practically the same type of work, it is my belief that we should attempt to put them on the same wage basis.

On the whole, our group of 49 employees is quite satisfactory. As the executive to whom each of these 49 employees is responsible, I consider their problems in regard to the library are my problems, and therefore deserve my consideration. Certainly, it would be desirable to have more college graduates and library school people on the staff, and it is my intention that we will, but not at the expense or to the demotion of any of our present employees. It is my belief that we could have too many college and library school people, because no more than half of our staff positions require that extensive education.

It is in the matter of general expenses that our most difficult problems exist, because it appears that the city appropriation for this item has never been sufficient. During recent years, our income from Trust Funds has been about \$10,000 annually. Due to an extremely low appropriation however, we have been forced to use about \$2,000 of this per year for binding, and almost another \$2,000 for such items as janitors' supplies, postage, express, printing, etc. If the full \$10,000 were available for books, and the city would appropriate \$12,000 per year for general expenses rather than \$4,500, our service to the community would be improved and expanded far in excess of this small additional amount. The \$7,500 necessary beyond the present appropriation represents only about .05 on the tax rate, far too little to justify the continued use of Trust Funds for such items as are the normal responsibility of the city. Furthermore, this additional amount would give us the opportunity to do some substantial repairing every year, until the now poorly-conditioned interior and exterior of the library structure are brought to a neat appearance. It is difficult to believe that such a small amount as \$200—\$500 per year, which has been the city appropriation for repairs in recent years, would be expected to maintain the physical upkeep of a piece of property that is valued in the high hundred-thousands. For want of painting and refinishing, our beautiful appointments throughout the main building and South Branch are slowly deteriorating.

Our expenditures in 1942 from municipally appropriated funds, including \$55,000 for salaries, about \$4,500 for general expenses and new equipment, and an estimated \$10,000 as the cost of municipally supplied light and heat, will total approximately \$69,500. On the basis of a complete city budget of \$7,000,000, this \$69,500 represents only about .01 on each tax dollar.

If we add to this \$69,500 our \$10,000 Trust Fund income, we will have a figure of \$79,500, possibly our total expenditures for 1942 as based on present estimates. This gives

us a cost of .72 per capita, which is far less than the average for cities of similar size and circumstances. The American Library Association recommends \$1.00 per capita. Taking Lynn as a comparison, we find that the city appropriates \$95,000 for the library as against our \$69,500, that it has about \$11,000 for books as against our \$6,000, and that it circulates about 100,000 books more per year than we do.

From the foregoing it is plain that strong efforts must be made to explain our position to members of the city government, so that they will have the opportunity of understanding our problems and objectives. I believe that if we do give them a complete picture of the situation they will attempt to help us.

TRUSTEES

In April Rt. Rev. Msgr. John F. McKeon, Mr. William R. Freitas and Mrs. Roberta Barnet replaced the Messrs. T. Everett McPeake, Frank Vera, and Joseph P. Trudel, respectively, on the Board of Trustees.

An Advisory Art Committee, consisting of Messrs. Allen Dale Currier, Clifford W. Ashley, Bryant Prescott, Howard G. Crowell, and Mrs. Palmer Scott, was set up by the Trustees for the purpose of examining and appraising the library's art treasures with a view toward rearrangement.

STAFF

In February Miriam R. Haney and Thomas Payne were appointed to the part-time staff.

In May Marian McGregor resigned and was replaced by Deolinda Perry, who in turn was replaced by Thomas Payne as full-time page.

Elizabeth McGuinn, Natalie Cash, Margaret Tighe, Sandra Manelis, John Buckley, Robert Payne and Edwin Silveira were appointed in June for summer work.

Mrs. Mary Morrow, cleaner at West Branch resigned in June.

Thomas Payne resigned to take another position in August.

Sylvia J. Ciaburri and Kathleen U. Lawless resigned from the Staff in September, both to be married. Deolinda Perry was appointed Supervisor of Stacks and Periodicals, combining her own position with that of Miss Ciaburri. Miss Lawless was not replaced by a full-time Staff appointment. Doris Sanderson was appointed assistant to Miss Perry, replacing Thomas Payne who had left in August. Hubert Oliver was added to the part-time Staff as page.

Also in September, Miriam R. Haney resigned to go to college and Burnice Pierce left for another position. Miss Helen Boch and Mrs. Mabel Coates were put on as temporary book repairers after the WPA mending project was terminated. Muriel Paradis was appointed to the part-time staff, and Mrs. Christine Kozorek, janitress at the Main Library, was given the additional duties of cleaner at West Branch in place of Mrs. Morrow.

Gertrude Rusitzky resigned her position as Branch Librarian at South Branch in December, and was replaced by Stella M. Patla. Miss Patla was replaced in the Catalogue Department by Lucille Letourneau.

The Librarian and several members of the Staff addressed various groups throughout the city, and a large representation was present at the A. L. A. Convention in Boston and local library meetings also drew the attendance of many. The Librarian attended the Massachusetts Library Association meeting at Williamstown in October, and also several of the monthly meetings of the Massachusetts Free Public Library Commission, of which he has been Secretary for several years.

GIFTS

The Clara L. Tripp bequest, amounting to more than \$20,000 was turned over to the Library Trustees early in the

year, and the Trustees selected as their agent the Merchants National Bank. This generous fund enabled us to make a number of improvements in our school collection during the summer.

Among the other gifts received during the year were books, magazines and other items of a library nature from Mrs. Lillian E. Doyle, Mark Duff, President of the Merchants National Bank, Representative Philip Barnet, Basil Brewer, Fort Phoenix Chapter, Daughters of the American Revolution, Lester A. Eggleston, William M. Emery, Jennie D. Greenberg, Mrs. Edward Holmes, Henry B. Hough, Atty. Harry A. Lider, Mrs. Frank M. Howes, Mrs. Ellen E. Jenney, George A. Thomson, Milton A. Travers, Rev. H. B. Williams, D. D., Mr. and Mrs. A. H. Wright, La Forest E. Osborne, Councillor Rodolphus A. Swan, Gertrude Rusitzky, Mrs. Anna Senft, Jesse Sylvia, Rev. Michael P. Testa representing the Portuguese Presbyterian Church of Newark, New Jersey, and Rev. Frederick W. Sandford.

We are most grateful for all these gifts as well as the numerous other individual volumes that have been donated by persons and organizations.

RECOMMENDATIONS

Some of the items included in the following list have already been approved and are scheduled for completion in 1942. The others are suggested as necessary steps to be taken as soon as possible.

- 1—Planning of a radio program, with book reviews, dialogues or interviews concerning the business of the library.
- 2—Establishing a library newspaper column with the cooperation of the local newspaper publishers.
- 3—Consider the advisability of public forums to be held in the lecture hall.
- 4—Issue mimeographed folders and lists of books and pamphlets on timely subjects.

- 5—Reorganize and extend Hospital Service. Inaugurate book service to invalids in their own homes.
- 6—Extend school book service to more parochial schools.
- 7—Improve lighting conditions, refinish woodwork and paint or clean walls and ceilings at Main Library and South Branch.
- 8—Plan for new branch library buildings North and West.
- 9—Consider outside cleaning and landscaping after the war emergency. The Garden Club will cooperate in this.
- 10—Establish an inventory policy with fiction to be done in 1942, non-fiction in 1944, fiction again in 1946, and so forth. Very necessary as no complete inventory has been taken for many years.
- 11—Set up a permanent inventory of supplies.
- 12—By subdividing the Patent Room, arrange space and equipment for a Treasure Room.
- 13—Plan for an Adolescent Department.
- 14—Plan for remedial reading clinic.
- 15—Organize a Friends of the Library group to include former members of the Board of Trustees and other interested persons in the city.
- 16—Install more efficient telephone system.
- 17—Interchange Reference Room and Ingraham Hall for purposes of efficiency.
- 18—Begin microphotography of local newspapers.
- 19—Establish a definite policy in regard to fees for non-resident borrowers.
- 20—Weed out old books and magazines.
- 21—Purchase steel filing cabinets for the picture collection.
- 22—Set up a complete plan of organization, classification, salaries and wages for all employees.
- 23—Make strong efforts to have city appropriation increased.

CONCLUSION

I am very glad to have this opportunity of expressing my sincere gratitude to the Library Trustees and library employees, to the various city officials with whom I have come in contact, and to the many business men and other citizens of New Bedford, all of whom have helped make my first year here a most pleasant and happy one.

Respectfully submitted,

WILLIAM T. O'ROURKE.

OFFICE OF THE PARK BOARD

Room 205, Municipal Building
New Bedford, Mass.

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

To the Honorable the City Council:

Gentlemen:

The Board of Park Commissioners has the honor to submit herewith the annual report of the Park Department for the year 1941.

Meetings:

Twelve regular and three special meetings were held during the year.

At special meeting held in January, Mr. Antone Mello was elected Chairman, to succeed Mr. Ovila Fortin who was elected a City Councillor, and thereby prevented by law from further membership on the Board.

Mr. George Cushing was elected Secretary to fill the office vacated by the elevation of Mr. Mello.

The annual budget prepared by the Superintendent was presented at the regular meeting in January. After voting to adjust the wages of several employees to the same scale paid for similar work in other departments the budget was approved for submission to the Mayor.

Mr. Ernest Robitaille was appointed by the Mayor and confirmed by the Council, a member of the Board to fill the vacancy caused by the resignation of Mr. Fortin. Mr. Robitaille qualified on March 8th, and attended his first meeting March 31st.

Mr. John Ramos was appointed a Commissioner for five years succeeding Mr. Papkin, whose term expired May 1st.

Bids for refreshment concessions were received at the meeting on April 30th from the following:

PARK DEPARTMENT

5 q

Buttonwood Park—

Ida Galkin	\$305.25
Martha Dangelas	281.25
Jeannette Leduc	151.00
Thomas Wilcox	101.00

Brooklawn Park—

Annie V. Flanagan	\$ 97.50
Jeannette Leduc	26.00
George Higham	25.50
Thomas Wilcox	21.00

Victory Park—

Jeannette Leduc	\$ 16.00
Thomas Wilcox	6.00
Mary L. Higham	5.50

At a special meeting on May 14th the Board awarded the concession at Buttonwood Park to Martha Dangelas for \$281.25, at Brooklawn Park to George Higham for \$25.50 (Annie V. Flanagan having withdrawn her bid on being advised there would be no provision for dispensing refreshments in the warming house during the winter.) Victory Park to Jeannette Leduc for \$16.00.

As required by law the election of officers was held at the regular meeting in May and resulted in Mr. Mello being re-elected Chairman, of the Board, and Mr. Robitaille, Secretary, both to serve till May 1942.

At the request of Mayor Glynn the budget for 1942 was prepared and approved at the monthly meeting in November.

A statement of the receipts and expenditures of the department and the annual report of the Superintendent are incorporated in this report.

Respectfully submitted,

ANTONE MELLO, Chairman
 ERNEST ROBITAILLE, Secretary
 GEORGE H. CUSHING
 JOHN L. RAMOS, JR.
 JOHN KOZIK

To the Board of Park Commissioners:

Gentlemen:

In presenting my annual report of the department activities in 1941 I again stress the need of additional help to properly maintain our parks and structures.

I have called attention to this condition from time to time, but with fewer men available each year the situation becomes more difficult. Without a larger working force than we now employ it will be impossible to keep up to the standards of the past.

During the year a total of 1849 days of labor were furnished us by the Welfare Department, W. P. A. and N. Y. A., this is the equivalent of six men on full time, and while this help was of great assistance it was not of the character that we ordinarily would hire. The men in most instances were too old or otherwise physically unable to perform arduous or continuous labor, and as they were assigned for only one or two days each week we never knew if the same men would return the following week, so there was no certain continuity of employment which would enable us to plan our work with any assurance that it would be done, a condition not conducive to efficiency and economy.

All phases of maintenance were necessarily affected. Grass was not cut as often as it should have been, buildings and structures were not kept up and are badly in need of painting, however by the untiring efforts of our men we accomplished what we could to make the parks as attractive as possible and at the same time furnish facilities for the use and enjoyment of the public, and we look forward to the time when we can continue to improve and enlarge our recreational plant.

I am again asking for additional personnel for next year to relieve the condition as far as possible.

Athletics:

There was a falling off in the use of our athletic facilities probably due to more prosperous industrial condition.

The new bowling green at Halliwell Park was opened for play but was not used extensively as it was our desire to allow the turf to become well established before subjecting it to hard usage.

Tennis courts and ball fields were kept in playable condition although there was some criticism that they should have been better.

Skating was enjoyed for a longer than usual period of twenty-seven days during which time the warming houses were kept open for the convenience and comfort of the skaters.

Common—Japanese Beetle

Two hundred rose plants were set out in the garden last spring but as many more are needed to completely fill the beds.

Japanese beetles did considerable damage during the season and seem to be increasing each year to such an extent, that we sought expert advice as to the best method of combatting this pest. After consulting with park authorities at Hartford where there are large infested areas we were told best results were obtainable by the use of arsenate of lead mixed with Milorganite as a carrier, spread on the lawns early in the spring while the grubs are feeding on roots before emerging as beetles in June. It was stated that an application of 10 lbs. of arsenate of lead per 1000 sq. ft. of surface will protect the area so treated for a period of five years. Consequently we purchased half a ton of lead and two tons of milorganite late in the year which will be applied in March and if successful, Bridge Park where there is a light infestation, will be treated in the early fall.

Ashley Park:

The new field house and comfort station built by W. P. A. was opened for public use on November 9th, but to the end of the year was not extensively used. In order to maintain this building it will be necessary to employ a full time attendant. The building has been kept open thus far by assigning one of our park officers to the park and having a laborer from Halliwell Park perform the janitor duties, an arrangement which is far from sat-

isfactory as it leaves other parks without an officer one day each week and deprives Halliwell Park of the only laborer available for that park.

Buttonwood Park:

The stone wall along Kempton Street was completed and has added greatly to the appearance of this section of the park.

The bridle path was widened and regraded throughout its length and the section bordering the ball field was relocated to prevent riders from the danger of being hit by batted balls.

In regrading the path it was necessary to disturb the old surface, which created a dust nuisance resulting in many complaints from the residents on Lake Street, and while we made several applications of calcium chloride during the summer it did not completely abate the nuisance due without doubt to the extremely long dry season. If the condition persists it will be necessary to resort to some more effective method or material to allay the dust.

Work of straightening and walling the slopes of the canal was started but abandoned with the closing down of all park projects leaving an unsightly condition which will have to remain until funds are provided to remedy the condition or W. P. A. operations are resumed.

Tree planting ceremonies in Memory of Mrs. Olive B. Sherman were conducted by the Phoenix Chapter D. A. R. at Buttonwood Park on April 25th.

Mrs. Sherman was the founder of the Chapter.

Prayer was offered by Miss Edith H. Cornell, Chaplain, and Joyce Kilmer's "Trees" was recited by Miss Emma T. Frost.

The members present participated in the exercises by filling in the hole with earth.

Mayor Glynn, Mr. Antone Mello and Mr. Cushing of the Board were present and, with appropriate remarks, accepted the tree for the City.

Brooklawn Park:

Work was started on the baseball grandstand and the new ball diamond, but was closed down before completion. The back stop and foundations were built for the stand and a large part of the diamond was completed.

The bottom of the pond was cleaned but no new sand was put back as was intended, thus leaving a clay bottom which caused the water to become roily when agitated by the bathers.

The duck pond project was completed with the exception of a surrounding fence to keep the water fowl within bounds.

Marine Park:

We are again indebted to the Garden Club of Buzards Bay for an additional gift of 200 shrubs to complete the replanting of the beds destroyed in the hurricane of '38. The plants have thrived and will add very much to the beauty of the park.

Flower Shows:

We regret we were unable to enter an exhibit in the Annual Flower Show of the Garden Club, but because of the acute shortage of help at our busiest time it was impossible to take on the additional work involved. However we did hold a chrysanthemum show in the greenhouse during the second week of November, which was open to the public.

The entire greenhouse was utilized for the display of 4500 plants representing thirty-three different varieties.

More than 7000 persons visited the show, many of whom expressed surprise and pleasure at the size and beauty of the display.

W. P. A. Projects:

With the transfer of men employed on park projects to defense work at the end of June, we were left with several unfinished construction jobs on our hands which, I presume we shall have to complete ourselves or allow to remain in an unsightly condition until such time as funds are available.

I take this opportunity to express my sincere appreciation of the unselfish effort of the employees to maintain all functions of the department to the end that recreational facilities were available throughout the year, and to the Commissioners for their support and advice I express my gratitude.

Respectfully submitted,

WM. P. HAMMERSLEY,
Superintendent.

PLANNING BOARD REPORT

City of New Bedford

January 1, 1942

To the City Council of the City of New Bedford.

Gentlemen :

The Planning Board submits its annual report for the year ending December 31, 1941.

The board held but five meetings during the year including three public hearings covering six petitions for changes in the use districts on the zoning map.

The following table shows the changes applied for and the action taken by the Planning Board and City Council.

ZONING CHANGES PETITIONED FOR — 1941

PLANNING BOARD

Location	From	To	Change recommended by Planning Board		Change made by the City Council		
			No	Yes	No	Yes	
Bonney and Jouvette Streets, S.E. corner.....	Business	Industrial "A"	No	Yes	No	Yes	No. 92
Coggeshall street, S. side 80' W. of Acushnet Ave.	Residence "B"	Business	Yes	Yes	Yes	Yes	No. 91
County Street, W. side, between Kempton and North Sts.	Residence "A" & "C"	Business	Yes	Yes	Yes	Yes	No. 90
Kempton Street, N. side W. of intersection with North	Business	Industrial "A"	Yes	Yes	Yes	Yes	No. 90
Matthew and Field Streets, S.W. corner	Residence "B"	Business	No	No	No	No	No
Matthew Street, S. side, between Field and Stephen	Residence "B"	Business	No	No	No	No	No

PLANNING BOARD

The expenditures of the Board for the year ending December 31, 1941, were as follows:

Appropriation		\$75.00
Annual Report	\$23.75	
Postage99	
Dues — Massachusetts Federation of Planning Boards	15.00	
Dues — American Planning and Civic Association	5.00	
Printing and Binding	14.25	
Total Expenses		58.99
		<hr/>
Unexpended Balance		\$16.01

Respectfully submitted,

MATTHEW A. GLYNN, Mayor,
Chairman.

HAROLD M. PICKETT,
Councillor.

OLIVA FORTIN, Councillor.

JAMES P. McCROHAN,
Member of Board of Health.

ANTONE MELLO,
Member of Park Board.

PATRICK J. FOLEY,
Commissioner of Public Works,
Secretary.

BOARD OF APPEALS

City of New Bedford

January 1, 1942

To the City Council of the City of New Bedford.

Gentlemen :

In compliance with Section 155 of the Building Regulations the Board of Appeals respectfully submits its report for the year 1941.

Meetings and public hearings have been held on the first and third Wednesdays of each month except at times when there were no appeals.

Forty-nine appeals were considered during the year. Forty-four were applications for variance from the terms of the Zoning Ordinance, and five for waivers of the provisions of the Building Code.

The following table shows the number and nature of the variances applied for and the action of the board :

Alteration and use of dwellings for occupancy by more families than allowed in the district	12 granted 11 refused 1 withdrawn
Alteration and extension of nonconforming uses	7 granted
Extension of Business use into Residence district	1 granted
Erection of buildings for Business use in Residence districts	1 granted 2 refused
Erection of wholesale ice house in Business district	1 refused
Alter store for garage nearer street than allowed by ordinance	1 granted

BOARD OF APPEALS

7 r

Change from one nonconforming use to one more objectionable	1 refused
	2 granted
Garage locations	1 refused
	1 withdrawn
Substitution of Neon sign for one of wood	1 refused
Industrial use in Business and Residence district	1 granted
	temporary permit
Waivers of Building Code	
(Garages)	1 Supt. sustained
	1 Supt. reversed
(Dwellings)	3 Supt. reversed

It will be noticed that the Board has been called upon to consider a large number of appeals for variances to enable owners of dwellings to make alterations providing for more tenements and apartments than are allowed by the zoning ordinance in the district in which the dwellings are located. These appeals have been granted when legally possible and when it has been deemed that no injury to the neighborhood would result. But the Board has denied, and must by law continue to deny appeals for such variances whenever it is obvious that no practical difficulty or unnecessary hardship exists and that the request is prompted mainly by the appellant's desire for additional revenue from his property. To grant such appeals would not only tend to lower the values of neighboring properties but would, if freely pursued, defeat the very intent and purpose of the zoning ordinance, which it is the duty of the Board to administer and uphold.

If a real shortage in living quarters should arise, it should be cured by some method other than appeals to the Board.

The expenses of the board for the year were as follows:

Clerical Work	\$115.00
Advertising hearings	52.92
Postage	25.75
Stationery	49.00
	<hr/>
	\$242.67

Stephen D. Pierce, Leo Lemos, and Raymond Boucher have served as associate members of the board during the year.

Respectfully submitted,

GEORGE T. SCHULER, Chairman.

JAMES F. COLLINS, Clerk

LEO L. LaBRODE,

LEO LEMOS,

COLEMAN LIPMAN.

REPORT OF THE POLICEWOMAN

I herewith submit the following report of my work as Policewoman for the year ending December 31, 1941.

Cases investigated	231
Conferences	115
Girls reporting to me for supervision	154
Homes visited—consulting parents regarding wayward girls	55
Schools visited—re: conduct of wayward girls, and girls involved in Court Action	12
Investigated home conditions for this Department	6
Returned “missing girls” to their home and consulted with their parents	4
Illegitimate child cases investigated	17

REPORT OF THE CHIEF OF POLICE

15 s

Accompanying girls for physical examination	11
Accompanying girls to State Clinic	1
Accompanying girls to State Dept. of Public Welfare	21
Accompanying girls and women to Massachusetts Reformatory	5
Accompanying girl to Bridgewater State Farm	1
Accompanying girls to Industrial School at Lancaster	2
Accompanying women to State Hospital at Taunton	35
Accompanying girl to State Hospital at Monson, Mass.	1
Accompanying women to House of Correction	15
Accompanying women from the House of Correction	5
Lost children cared for	5
Missing persons reported to me	1
Committed woman to Taunton State Hospital	1
Trip out of town to accompany runaway girl home	1
Trips out of town to get prisoners	2
Arrests made without warrants	3
Warrants served	2
Witness summonses served	2
Capias served	1
Parole warrants served	2
Mittimus served	20
Sworn affidavits taken for this Department	295
Extra hours of duty	81

Service in the various stores throughout the City during rush periods in the daytime; also in the various stores each evening during the holiday season.

I have also attended Criminal, Juvenile and Superior Court sessions.

Respectfully submitted,

ALICE W. DUPUIS,
Policewoman.

REPORT OF THE IDENTIFICATION BUREAU

Following is report of the Identification Bureau for the year ending December 31, 1941.

Total number of finger prints on file	13,567
Prisoners fingerprinted	120
Prisoners reprinted	7
Finger print cards sent to Federal Bureau	120
Finger print cards sent to State Bureau	120
Cards containing fingerprints received from F.B.I.	65
Cards containing fingerprints received from other sources	101
Prisoners fingerprinted, having local record	38
Prisoners fingerprinted, having other than local record	22
Criminal records received and filed	119
Criminal records furnished other departments	31
Apprehension notices received, noted in files	51
Notice received of arrest of subject with local record	58
Total number of personal finger prints on file	1,274

Number of personal finger print cards sent to F.B.I.	6
Personal prints of males taken during year	5
Personal prints of females taken during year	1
Fingerprint cards received from the Captain of the Port, searched, and filed in our files	225
Finger prints taken of Police Officers for F.C.C. license	88
Total number of finger prints taken of applicants for Civil Defense (two taken for each applicant)	3,494
Sent to Federal Bureau	1,747
Civilian defense applicants finger print cards in our bureau, yet to be classified and filed	1,747
Finger prints taken of veterans, for duplicate discharge	4
Fingerprints taken of persons in Coast Guard service	11
Fingerprints taken of persons entering U. S. Army	15
Fingerprints taken of persons entering U. S. Navy	4
Fingerprints searched against our files for Coast Guard	18
Fingerprints searched against our files for U. S. Army	22
Fingerprints searched against our files for U. S. Navy	51
Cases investigated	96
Extra hours	49
Fingerprints taken of civilians applying for F.C.C. license	8

Photographic Department

Films (4-5) exposed	231
Prisoners photographed (muggs)	120
Autos and accident scenes photographed	64
Crime scenes photographed	33
Persons assaulted	1
Miscellaneous, auto used in murder, strikers, windows broken, etc.	14
Films exposed (2½-3¼)	82
Photo of latent prints	36
Copy of photos, handwriting, miscellaneous	46
Photo prints (3-5) muggs, printed	600
Photo prints (3-5) muggs, sent to Federal Bureau	120
Photo prints (3-5) muggs, sent to State Bureau	120
Photo enlargements (8-10) auto accident scenes	64
Photo enlargements (8-10) latent finger prints	36
Photo enlargements (8-10) person assaulted	1
Photo enlargements (8-10) miscellaneous, auto used in murder, strikers, windows broken, etc.	14
Modus operandi cards and photos on file	2,490
Modus operandi cards and photos filed this year	153
Photos (muggs) sent to other departments	24

During the year there has been a large amount of finger printing of civilians for identification purposes and it is my opinion that within a short time, filing cabinets and classification indexing cards will have to be purchased, for keeping the files in order.

Respectfully submitted,

RAYMOND CHASE,
Deputy Chief.

Mayor.

Attest:

CHARLES W. DEASY,
City Clerk.

ANNUAL REPORT
OF THE
BOARD OF PUBLIC
WELFARE
FOR THE YEAR 1941

CITY OF NEW BEDFORD
MASSACHUSETTS

To His Honor the Mayor and the Members of the

City Government of the City of New Bedford:

Gentlemen:

The Board of Public Welfare respectfully submit herewith their Annual Report for the year 1941.

During the year 1941 the tremendous increase in private employment resulted in a large reduction in the Temporary Aid case load. Consequently, our costs for this type of assistance also hit a new low. It is our belief that we have reached bottom in our case load because of the physical condition of approximately 95% of those remaining on relief. The situation with reference to Temporary Aid for the year 1942 is, as we see it, no different from that of the past year. The only chance of any material increase would be the changing over of some of our factories to the manufacture of war-time goods, thereby requiring skilled help, or the closing down of factories due to inability to secure materials. The probability of this happening to the extent that it would seriously increase our case load is very slight but in these days of uncertainty it is best to prepare for any eventuality.

The year 1941 was the first complete year of our Food Stamp Plan. During the twelve months of 1941 we sold to persons eligible to participate under the plan \$432,973.00 worth of stamps. With these, the Government gave, through this office, free stamps to the amount of \$203,322.00. The plan has been a tremendous success. It has not only given the participants more nourishing food but it has also helped the merchants by increasing their business. The plan was enlarged last year by the Surplus Marketing Administration to include participation by those in the low income group.

The increase in private employment has resulted in a reduction of applications for enlistment in the Civilian Conservation Corps and, while we are still sending away all young men who apply, the number is very small in comparison with previous years.

The National Youth Administration is now confining all its activities to our defense program. This has resulted in the

loss of four N. Y. A. clerks who were assigned to the Temporary Aid office.

The Board continues to supervise the distribution of cards for clothing from the Surplus Commodities Division as well as all referrals for W. P. A. employment.

The division of Aid to Dependent Children showed a slight decrease in 1941 and the outlook for 1942 is that perhaps there will not be much change either way.

Chapter 729, enacted by the 1941 Legislature, will, of course, increase Old Age Assistance expenditures considerably after April 30, 1942. The case load for 1941 differed only slightly from that of the previous year and while the number of cases may not increase in 1942 the change in the law will result in increased expenditures.

The outstanding change in this Act is the raising of the minimum grant from \$30.00 to \$40.00 per month for all single cases living alone and from \$50.00 to \$65.00 per month for couples. There have been a number of other minor changes and we anticipate more changes in the rules and regulations as promulgated by the State Department, all of which will, without doubt, further increase the expenditures. The Old Age Assistance department is now located in new quarters in the building, a change that has been needed for some time. However, it is still the contention of the Board that for 100% efficiency all three relief offices should be on the same floor.

The City Infirmary has been causing the Board much concern during the past few months. Lack of physically able Welfare workers has created a serious problem at this institution and, as the year goes on, will, very probably, prove more serious. We have taken a number of precautions to protect the inmates in case of an air raid here in our city. We have cleaned out and fixed up rooms in the basement — one for the men and one for the women — where we anticipate moving the inmates in case this emergency should arise. These inmates, because of their age and physical disabilities, must rely on others to care for them at a time like this and we are doing everything humanly possible to prepare for anything that might occur.

In closing, the Board wishes to express their appreciation to the Mayor and City Council; to Mr. Frederick M. Coughlan,

State District Supervisor; to our local private charitable organizations; to our Chief of Police, Samuel D. McLeod, and to the many business and manufacturing concerns who have cooperated so well with us during the past year.

Respectfully submitted,

William A. Higgins, Chairman

John Moniz

Philippe J. Charette

Joseph A. Desjardins, Secretary.

OFFICE OF

BOARD OF PUBLIC WELFARE

CITY OF NEW BEDFORD

MASSACHUSETTS

BUREAU OF OLD AGE ASSISTANCE

Department of Public Welfare
New Bedford, Massachusetts.

ATTENTION OF BOARD OF PUBLIC WELFARE

Gentlemen :

In compliance with your request, I respectfully submit herewith a report of the receipts and expenditures of this department for the financial year 1941.

The Bureau of Old Age Assistance was in receipt of 662 applications during the year, and of this number, 531 were accepted for assistance. The case load as of December 31, 1941 was 3091 as compared with 3099 cases December 31, 1940, showing a decrease of 8 cases for the year.

The following pages will give you a detailed account of expenditures and reimbursements.

Respectfully submitted,

Charles A. McAvoy

Supervisor of Old Age Assistance.

Graduated: January, 215 — June, 363

TUITION RATES

Rates of tuition for non-resident pupils for school year, beginning September 3, 1941, payable quarterly in advance are:

High School	\$150.00
Junior High Schools	125.00
Elementary Schools	90.00

PER CAPITA COSTS

The cost of instruction per scholar is based on the average number belonging and the total amount expended for the maintenance of each department, not including expenditures from the Sylvia Ann Howland, Paisler or Bourne Prize Funds.

High School	\$79.10
Junior High Schools	90.92
Elementary Schools	73.61
Day Schools	77.20

The average cost per pupil in the different departments of the schools, for text books and supplies, has been as follows:

High Schools	\$3.29
Junior High Schools	2.33
Elementary Schools	1.09
Average for Day Schools	1.68

Report of Superintendent

To the Honorable School Committee:

Dr. Walker and Gentlemen:

It is the duty and privilege of the acting superintendent of schools to submit the eighty-first annual report of the Superintendent of Schools of this city.

It is the purpose of this report to mention important achievements of the past year, to make recommendations and suggest policies which should prevail at least during the period of the acting superintendency.

Present conditions bring to mind first the man who has served the City of New Bedford as its Superintendent of Schools for more than thirty years. It would have been impossible to have worked in close relationship to this man without realizing his exceptional ability as an administrator, the democratic principles he followed in dealing with his fellow teachers and his whole-hearted concern for the welfare of the boys and girls of New Bedford. This is a tribute to an efficient superintendent in the hope that he may be able to return to his position of leadership in a very short time.

On November 28 Mr. Keith requested a leave of absence for three months or until he should be able to return to his duties full time. His ability to do this would give the department the value of his services from the date of his return until he retires under the teachers' retirement law.

Regardless of when this retirement takes place the task of selecting Mr. Keith's successor is one which must receive

the consideration of the committee during the coming year. The committee must be in a position to give this matter its most serious attention. Mention of this fact is made in this report not for the purpose of telling the committee its duty but rather to assure it that the present acting superintendent wishes in no way to handicap the committee in arriving at its decision. The selection should be the result of careful study unimpelled by the desires of any candidate.

This leads to a second important consideration. An assistant superintendent should be chosen at an early date if the present acting superintendent is not to return to his duties as assistant superintendent. Work has greatly increased due to the war and the head of the department should not be left without an assistant at this time.

This thought brings to mind the present crisis and what it implies for this department. Before war was declared the civilian defense authorities were contacted and arrangements made for a mass meeting of teachers at which speakers told what civilian defense work meant and how it was to be achieved.

Immediately the acting superintendent sought help in determining what should be done to protect children in case of war. This has not been an easy task. The best help that could be secured came from those teachers who had taken the air raid warden's course given by the civilian defense authorities.

Too much credit cannot be given this group of teachers under the leadership of Miss Ellen C. Sweeney, the supervisor of elementary grades. It consisted of Miss Jane E. Thuman, Miss Margaret T. C. Murphy, Miss Mary E. Ryan, Miss Ruth B. McFadden, Miss Hope McFadden, Miss Mary Ciaburri, Miss Rose Ciaburri, Miss Dorothy Tattersall and Mr. James R. Hayden. Miss Bessie F. Nesmith has recently been added. Every aid that could be secured from federal,

state and local sources was combined with the knowledge possessed by this committee and resulted in certain minimum instructions, approved by the civilian defense authorities, being sent to principals for air raid precautions.

This in itself was not sufficient. Principals needed more help. It seemed best to appoint someone who should make it his full time job to obtain additional information which would supply the principal with what he needed in determining the best possible procedure for his school to follow. Mr. James R. Hayden, a teacher in the High School and a trained air raid warden, was selected for this important task. Mr. Hayden began his duties at once and has had the wholehearted cooperation of Mr. Frederick Ripley, the Superintendent of Buildings, and his staff.

The work of the teacher committee must be continued and additional suggestions will be sent to the principals as conditions demand.

A condensed course for teachers in air raid precautions has been completed and will be given immediately after the holidays. It is hoped that all teachers will take this course. In addition teachers in large numbers have signified their intention to take courses in first aid.

At the suggestion of His Honor, Mayor Glynn, plans have been made with the assistance of Mr. Dana Gillingham to sell defense savings stamps in the schools. To date approximately three thousand pupils are participating in the buying of stamps and bonds to the amount of more than ten thousand dollars. The number of participants is increasing daily.

Junior Red Cross units have been organized in the schools and under the leadership of teacher sponsors are engaging in Red Cross work. The department is providing quarters for classes in civilian defense work for adults when-

ever and wherever it can do so. The United Service Organization has also sought assistance which will be given when possible.

These facts indicate the extent to which the department has responded to the opportunities offered for participation in those activities which provide service to the government and its people. The School Committee may well be proud of the response made by its teaching staff and other employees to the call for cooperation in the present situation.

This does not mean that the ordinary work of the schools is being neglected. In these days education must be carried on and strengthened as far as possible in the light of occurring events.

The State Supervisor of Special Classes requested that a survey be made in this city to discover pupils who may need the service which can be rendered only by special class instruction. This will probably lead to the establishment of additional facilities for such pupils and sometime during the coming term recommendations concerning them should be made.

Portables have sometimes been used to provide temporary quarters for pupils where additional room has been needed. Complaints regarding their use in some instances have been frequent. Their use should be discontinued when possible.

The department has vainly endeavored to secure an addition to the Betsey B. Winslow School in order that portables there might be abandoned. The transfer of pupils to other districts and the changing of district lines have been considered and provided no solution of the problem.

There is another possible solution which should be given

consideration. This is the transfer of the eighth grade pupils in the Betsey B. Winslow School to the Clarence A. Cook School where there is room for them at the present time. This would allow two classes now in portables to be removed to the main building.

These changes may mean sacrifice on the part of those who may prefer to remain in the Betsey B. Winslow School until graduation from the eighth grade but one fact to be faced is that obtaining some things we like usually means giving up others we desire.

Since there are three portables now in use at the Betsey B. Winslow School one class would still have to be housed in a portable unless it seemed better after study to transfer this class to the auditorium.

In like manner one portable at the Thomas R. Rodman School could be abandoned if it is possible to transfer an eighth grade to the Clarence A. Cook School. The use of the portable at the Sylvia Ann Howland School should also be discontinued whenever the class housed therein can be removed to the main building.

One of the most efficient individuals at headquarters is the storekeeper custodian-in-charge, Mr. John Egan. In recent years the duties of this gentleman have increased to such an extent that the position, in the opinion of the acting superintendent, should be that of chief custodian. Therefore, it is proposed to raise Mr. Egan to this rating with the approval of the Civil Service authorities and to have the salary fixed in accordance with the duties performed.

The Portuguese language will be included in the Commercial and Civic Curricula of the High School with the opening of the new term in January, 1942. The department is fortunate in securing the services of Miss Laurinda C.

Andrade for the teaching of this important subject. Classes in Portuguese and Spanish have already been established in the Evening High School.

New Bedford has been selected as an examination center by the National Committee on Teacher Examinations. The acting superintendent was named local examiner at the suggestion of Mr. Keith. Pressure of work caused the acting superintendent to request the right to delegate this authority to Miss Ellen C. Sweeney who has taken care of this piece of business in her usual efficient manner.

A Department of Guidance and Placement should be established soon. The High School Principal has recommended it on several occasions and the department is more or less committed to such action whenever it can be fitted into the plan formulated by the State Department of Education.

Progress must be the watchword in any department of education. If there is no going forward there will be a backward movement. There is no such thing as standing still. This applies in no small measure to the teacher and his teaching efficiency. Policies of the department must be shaped more and more to recognize superior workmanship in naming new teachers and in promoting those already in the service. It is true that a candidate must provide evidence that he is properly qualified for the job; it is also quite probable that the holding of degrees indicates the acquisition of desirable training, but there is nothing that can take the place of actual successful experience, proof that the candidate can put into practice whatever he has acquired through his training.

It should be the policy of the department to arrive at procedures which continue to give greater values to successful achievement. Principals and supervisors should constantly improve themselves as evaluators of the work of the teacher

and their evaluations should be duly recognized as coming from persons in authority.

Fortunate indeed are those who are citizens of the United States of America. Happy are they in the enjoyment of their rights and privileges but these rights and privileges carry with them responsibilities. At all times but especially in these critical days must these responsibilities be assumed to their highest degree. This department's real achievement will be determined by its ability to assume these responsibilities and by its success in training its boys and girls to recognize and carry them out.

The acting superintendent appreciates the excellent co-operation he has received from all members of the department and the kindness and consideration given his efforts by the School Committee.

Respectfully submitted,

EDWARD T. N. SADLER.

Report of the Supervisor of Elementary Grades

Mr. Edward T. N. Sadler
Acting Superintendent of Schools
New Bedford, Mass.

Dear Sir :

In compliance with your request, I herewith present the thirteenth annual report of the Supervisor of Elementary Grades.

Since September, 1938, when the elementary schools of New Bedford changed from semi-annual promotion to a promotional procedure based on continuous progress for each pupil, pupils have been promoted from grade six in June only. However, children who have reached the age of six years on December 31, enter grade one in September and children who have reached the age of six years on May 31, enter grade one in January as formerly. This means that the majority of pupils entering grade one in September will make continuous progress through the grades and complete the work of the elementary school in six years, in June. It is found that some pupils who enter in September may need, because their rate of learning is slower, seven or even eight years to cover the elementary school curriculum. However, the promotional procedure is so flexible in its organization and administration that pupils reach their goal through adjustment and not through failure and repetition. In every group are children who, because of physical or mental handicaps, receive much more help in classes adapted to their particular needs. In every case, the physical, mental, emo-

tional and social needs of the child are studied and he is placed where the school believes he will receive the greatest help.

Pupils entering grade one in February can never complete the elementary school curriculum in six years as no promotions from grade six are made at any time except in June. At the time of the change from semi-annual promotions, the transition was made in grade 5A. This has led to the belief, in some cases, that the adjustment should always take place at this point. Adjustments may be made, and should be made, over a period of five grades, beginning with grade two, at whatever level it may seem most helpful to the pupils.

While some children, who were physically and mentally superior as well as emotionally stable, were accelerated during the transition period, it has seemed unwise to advance pupils so rapidly that they reach grade seven too young to find success and satisfaction in their school work. Therefore, some of the pupils have an added half year during their elementary school life. This does not mean a half year of failure and repetition but an opportunity to enrich the work of the grades and strengthen the study skills. The pupils should approach their entrance into grade seven with confidence that the extra half year has enabled them to add to their fund of knowledge, increase their emotional stability, and give them increased maturity that will aid in their social adjustment.

The past year has brought a much greater recognition of the individual child. Teachers on every level have the welfare of the pupil in mind and are constantly studying procedures to foster proper development of each pupil, which will insure individual growth in the right direction. Since September, the Supervisor of Elementary Grades has been called in conference in an unusually large number of cases

where teachers, principals and parents have honestly tried to answer the question, "Where can this pupil receive the greatest help? How can we help him most?" Individual cases are being studied continually. A flexible promotional plan affords an opportunity for the pupil to take time to overcome a difficulty in one phase of his school work before proceeding to another. Properly organized and administered flexible promotion stresses thoroughness.

The curriculum of the elementary school is constantly in a state of revision. Formerly, courses of study emphasized blocks of subject matter. As the schools have recognized and accepted more and more the responsibility of the development of the personality of the individual, the curriculum has been extended and enriched to include experiences which will help pupils to better understand and become adjusted to their environment.

Curriculum changes come as a result of educational research, but always on the basis of the need of a particular community. During the revision, committees give much time and intelligent study to content in order to determine its retention or elimination from the curriculum or, if it is new material, to determine whether it should become a part of the curriculum.

This year, committees are at work, revising or building courses of study on the elementary school level in language (including spelling), geography, science and arithmetic. The committees are made up of teachers and principals who are giving careful consideration to the needs of the boys and girls of New Bedford.

A committee of first grade teachers under the leadership of Miss Helen F. Moore, principal of the Sarah D. Ottiwell School, is making a study of seat work for pupils of grade one. This study is to be continued in grade two in order

that pupils of these two grades may have work between classes, which is an outgrowth of their school room activities and which is interesting, educational and profitable, encourages good work habits, helps develop accuracy and is a vital part of the school life of each individual pupil in these grades. An opportunity will be provided for teachers of grades one and two to study the different types of seat work prepared by the committees. It is recommended that some of this material, after it has been tried out by these teachers and found helpful, may be printed and used as a part of our first and second grade teaching program.

Every third grade class completing the work of grade three in June, 1941 prepared a class book on one unit chosen from their reading program. These books were assembled at the office and teachers given an opportunity to study them. It proved to be an excellent collection of which every third grade class may be proud. They revealed what an enriched reading program these children had experienced and gave direct evidence of how a study of a reading unit extended into the child's entire school program—spelling, language, arithmetic, science, music, hand work and pupil activity which not only added to the child's growth in reading ability, but widened his interests. In many cases the pupil committees at work in preparing and assembling the materials for the book, fostered democratic living within the classroom.

In September, we began the fourth year of the Unit Activity reading program. We feel that we are fortunate in being able to continue this program which insures us steady forward growth in reading, based on an excellent reading foundation laid in grades, one, two and three. Too often it has been taken for granted that children were taught to read in the primary grades and it was not necessary to continue the teaching of reading in the intermediate grades. Now we know that reading is the tool which helps to give meaning to geography, history, science, arithmetic, and almost every

elementary school subject. In these grades emphasis is now placed on vocabulary meaning and growth, comprehension, and skill in using diacritical marks which adds to the child's power to pronounce new words he discovers in his reading in and out of school. The pupil also needs to acquire skill in using the glossary in the readers which is the beginning of the use of the dictionary, skill in work analysis, and skill in syllabication, all of which help the pupil to become an independent reader. This year we have attempted to integrate the work in reading and geography to form one center of interest.

Last spring, informal dictionary tests were given in grades four, five and six in April, May and June. These tests measured the time children required to locate ten words on each grade level. They aimed to arouse interest and act as a motivation for practice in the use of the dictionary in the intermediate grades. They helped to familiarize the pupils with the dictionary and showed the gain in facility in locating words with understanding, speed and accuracy from April to June on each grade level and from fourth grade to sixth grade. This work revealed, in some cases, a need to place greater emphasis on how to use the dictionary and, in other cases, a proficiency in its use which serves as an excellent basis for all reference work.

In March, 1941, the fifth grades throughout the city, in seventeen schools, were given the standardized arithmetic test of the Iowa Every Pupil Tests of Basic Skills. The test included three parts: part I, Vocabulary and Fundamental Knowledge; part II, Fundamental Operations; part III, Problems. The results of these tests show that, although Vocabulary and Fundamental Knowledge and Problems need greater emphasis, in the test on Fundamental Operations every school exceeded the grade norm for the nation. Therefore, the results of this test are not only helpful to teachers of grade five but to principal and supervisor who may study

them in relation to the curriculum and teaching techniques in grades below.

City wide, standardized subject tests are valuable for teachers, principals and supervisor. For teachers, they determine the specific aspects of the pupil's development most in need of individual attention and serve as a basis on which to plan remedial and individualized instruction. For principal and supervisor, they locate areas which need increased emphasis and attention or suggest need for revision of the curriculum.

Changes in personnel are constantly taking place in the elementary schools, changes which are of vital importance to the continued growth and forward progress toward our educational goals. Last June, three principals retired from active service in the elementary schools and Miss Irene M. Bassett resigned as Supervisor of Special Classes. These were educators who, through many years of loyal and efficient service, had brought to their work a knowledge and understanding of school needs and problems. Those chosen to succeed them are people whose training and successful teaching experience had fitted them to assume added responsibilities of leadership. As teachers and principals retire, the workers who are chosen to take over their work must be forward looking leaders of high standards and interested in continued professional growth. For, if our schools are to maintain the standards they have reached and be insured continued progress, there must be strong, capable leaders.

The years ahead demand a greater responsibility on the part of every one in the elementary school in order to safeguard our boys and girls and yet keep life within the school as normal as possible. Children should not be deprived, any more than is necessary, of the happiness which belongs to childhood. We must learn to a greater degree than ever before to recognize essentials in order to conserve our health

for the imperative duties that confront us and that lie ahead. What are some of the resources on which we may call? We have intelligence, sympathetic understanding, the will to work, a belief in our purposes and a willingness to cooperate with others to realize these purposes. Whatever the need may be, the teachers, principals and supervisors, everyone working in the field of elementary education, may be counted upon to continue to give their best thought and effort to the education and welfare of the boys and girls in the elementary school.

It is an inspiration to work with the teachers and principals whose loyalty and teamwork make possible the continued growth and success of our schools.

I appreciate and gratefully acknowledge your intelligent and sympathetic understanding of the problems which have been ours during the past year.

Respectfully submitted,

ELLEN C. SWEENEY

Report of the High School Principal

Mr. Allen P. Keith
Superintendent of Schools
New Bedford, Massachusetts

Dear Sir :

I herewith submit my report as principal of the New Bedford High School.

Most of the colleges to which we send our graduates submit copies of their scholastic records for the first year of attendance. These records received during the past year show a continuation of the high standard of work achieved by pupils who have prepared in this school. In addition our files show several cases of special honors granted our graduates because of their high standing. Reports also continue to come in of graduates who have gone into the business world and are successfully filling responsible commercial positions. I feel, therefore, that I can unreservedly state that the work of the school during the past year has been fully as successfully accomplished as in any year in the past. An indication that the work of the school is on an ever upward trend is the fact that the Honor Society, the group of pupils of high scholastic attainment, is increasing in size each year. This term the society has enrolled more new members than ever before in its history.

The enrollment for the year has fallen off, as was to be expected, for pupils of legal working age have left in considerable numbers to fill the many demands for workers in

the defense industries and in the national services. In the fall of 1940 we enrolled 2770 pupils as against 2449 in September, 1941. This represents a loss of 331 pupils, but since the school in 1940 was far too overcrowded this decrease merely released some of the pressure. Even with the smaller enrollment this year it is still necessary for us to use the auditorium as a study hall for many periods each week and the average number of pupils per teacher is approximately 30, whereas the standard number for best accomplishment is generally acknowledged to be 25.

The enrollment in the commercial department maintains its ascendancy over the college preparatory department by about forty per cent and requires a continuation of the afternoon classes in typewriting. I can see no prospect of changing this in the near future.

Our athletic department again had a very successful year and has been a credit to the school. Mr. Dodge, the coach, is doing a most creditable job. Not only have the teams won the large majority of their games, but they are noted for their good sportsmanship. This is particularly true of the Tech Tournament, where our basketball teams are always complimented for this attribute.

As predicted in my last report, our new commandant of the R. O. T. C. has proved himself to be another of those popular officers whom the school has been fortunate enough to have assigned here for many years past. Major Taliaferro's personality has made him popular with all who have met him and his enthusiasm and ability have enabled us to again have the unit designated as the Honor Unit of the corps area.

The real credit for the success of any school should, of course, go to its faculty. It is the teachers who train the young people in the lines that they expect to follow upon

leaving school. It is the teachers' influence upon the pupils that determines to a large extent the attitude of the pupils toward their work and interests in life. The New Bedford High School has a faculty that is second to none and New Bedford can well be proud of it. Too little credit is given the teacher by parents and public. Too often the finger of criticism is pointed and too seldom the word of praise is given. The six and a quarter hour school day is seen all too brightly, but the hours of work at home correcting papers and preparing for the next day's work in order that the pupils may get the most from those six and a quarter hours, is usually lost to sight. The fact that the teacher is constantly under a terrific mental strain is rarely considered—the school vacations are usually the focus of the public's opinion of school teaching. We believe we have a splendid high school faculty; we believe this faculty is doing a fine job; we want the public to know and to realize this; we invite public inspection and ask for public cooperation. Constructive criticism is always welcomed. We want to make this school the finest high school in the country and this can be done with a thorough understanding on the part of the public of our aims and efforts and a complete cooperation between faculty, parents and public.

During the summer of 1941 a demand for the inclusion of the study of the Portuguese language in our high school curricula was made by a group of interested citizens. This demand was recognized as logical by the School Committee and it was voted to order it so included. We are planning to introduce this subject into our Commercial and Civic Curricula with the beginning of the February, 1942 term. Preliminary surveys tend to show that the course will be popular and a valued addition to both the cultural and practical sides of the curricula.

For the past three years I have recommended the establishment of a placement bureau here in the high school.

An attempt by the State Department of Education to put a bill through the legislature concerning the establishment of such bureaus has side-tracked our efforts for the present. I still believe we should have such a bureau and that we should not wait until the present emergency is over. When that time comes the need for such a utility on our part will be tremendous—jobs will be scarce, and applicants many. The time to prepare for that situation is now—not after the need is already in our hands and no preparations made to meet it. I again recommend the creation of this placement bureau.

Respectfully submitted,

ALLISON R. DORMAN

Report of the Supervisor of Vocal Music

Mr. Edward T. N. Sadler
Acting Superintendent of Schools
New Bedford, Massachusetts

Dear Sir:

In accordance with your request I herewith submit the annual report of the supervisor of vocal music.

Since its reorganization somewhat more than four years ago, this department has been chiefly engaged in an effort to vitalize and enrich the teaching of music in our schools. To this end it has sought not only to improve materials and methods but also to broaden and invigorate the program of musical activities.

During the past year certain gains have been made in the direction of these objectives. They are reported below.

Text-books: This year will complete the introduction of new text-books in all elementary grades. The new material has been well administered by the teachers and has brought to the children an increased interest, improved skill, and greater enjoyment.

Course of Study: Work on a course of study for primary grades was begun in 1939. The first section of that course was completed last June, and this fall has been distributed to first grades throughout the city. Meanwhile the course for second grade which was discussed and planned during last year has now reached the experimental stage. It

will receive a year's trial in six classes and be ready for use in all second grades next September.

Both these courses rest on the premise that music education should offer children as rich and varied a musical fare as the school can contrive. First and second grade music will, therefore, seek its objectives through a wide variety of musical experiences, namely:—song-singing, bodily response to rhythm, listening, and creative expression. Thus every child, throughout the range of abilities, may find his own interest and something to enjoy. The very musical pupils may participate heartily in all the activities. Pupils of less ability may find pleasure in at least one type and from there be led to others. In any case the primary aim of both courses is to provide rich and pleasurable musical experiences through which children may be led toward an increasing appreciation and enjoyment of good music.

These courses of study are the contribution of teacher committees working with members of this department. The advice of these experienced teachers has been invaluable and indispensable. To date, four committees, each including nine to eleven members have given several months of study and thoughtful discussion to this project. In January a similar group will begin work on the course for the third grade.

Music Week: During the week of May 4th, designated as Music Week throughout the United States, thirty-one local musicians gave concerts to the children and teachers of eighteen public schools in our city. The following Sunday evening, a public concert held in the New Bedford High School auditorium served as a climax to the week of music in the schools.

Although there is no way of estimating the exact value of this music week project, we know that our children were

privileged to hear programs of exceptional interest and artistry. Their attention, their comments to their teachers and their letters to the artists indicated a keen enjoyment. There can be little doubt that the music left its impress of beauty.

Music Week in the schools was sponsored by the Associated Directors of the New Bedford Public School Glee Clubs.

Glee Clubs: This year there are sixteen active glee clubs in elementary, junior and senior high schools. The clubs are made possible through the interest and devotion of a number of musically talented teachers who generously give their time to serve our children. This year there are twenty teachers directing and accompanying these organizations. It is my opinion that no other single project sponsored by this department has returned richer dividends than the work with the glee clubs. The outcomes are evident not only in the musical growth of the club members, but also in the improved standards of tone and interpretation throughout the city.

Recommendations: It seems almost incredible that for a period of nearly ten years our senior high school has offered no courses in vocal music. A school of the size and calibre of our own, situated in this music-loving community should be offering its pupils every possible musical opportunity. Yet today, for all but the privileged few, graduation from junior high school abruptly closes the door to further instruction in music.

It has long been recognized that song-singing is the one means through which all the children of all the people may freely enter the world of music. Every child provides his own instrument, and using it may be taught, not only the technique of beautiful singing, but also the essentials of musicianship. Song is, therefore, both an effective and

economical agent through which to teach music, from primary school through high school and college.

A full course in vocal music on the senior high school level may include choruses of various kinds, glee clubs, small ensembles, and classes for specialized study of voice. Often these are supplemented by classes in theory and appreciation.

Our New Bedford children are ready for such courses and deserving of them. I most earnestly recommend the early appointment of a well-trained, experienced teacher of vocal music for the senior high school.

As the work of this department expands, so increases my indebtedness to the teachers and principals. I wish to express my sincere appreciation for their good work, and unfailing cooperation.

I am most grateful to you for your kindly interest and your help.

Respectfully submitted,

MILDRED L. BAILEY.

Report of the Supervisor of Practical Arts

Mr. Edward T. N. Sadler
Acting Superintendent of Schools
New Bedford, Massachusetts

Dear Sir :

It is my privilege to herewith submit the annual report of the Supervisor of Art.

"Education does not mean reading, writing and memorizing alone. One must also learn to use various tools intelligently with his hands."

The past year has been one that has seen the realization and fulfillment of a number of things planned for and recommended in past years.

ART EXHIBIT

This exhibit, the largest and most varied of its kind seen here in New Bedford, was held at the Clarence A. Cook School this past spring on May 7-8-9-10, Wednesday, Thursday and Friday evenings from seven to nine o'clock and Saturday afternoon from two to five o'clock.

The work of our public school children from Grade One through the High School occupied the entire floor of the auditorium and one of the classrooms. All drawings, designs and other work of a flat nature were mounted on standard size cardboards. These in turn were mounted on spe-

cially designed upright frames arranged in a huge "horseshoe" formation.

Against the rear wall of the auditorium tables were lined with many creative projects integrating the work of varied subjects. These projects, some simple, others demonstrating great skill, helped to crystallize the information obtained from research and study of the particular subject.

Inside of the "horseshoe" was the greatest attraction of the whole exhibit and as anticipated, proved to be the most popular. Children representing the Elementary, Junior and Senior High School classes were observed working in a classroom atmosphere. The pupils were the center of attraction; it was their night, the teachers were very much in the background. The greatest enthusiasm and admiration centered around the youngsters in the primary grades for they "stole the show."

On the stage were the "stained glass windows" designed and executed by pupils of the High School Art Department. These beautiful windows served as a setting in the Christmas Pageant presented at the High School. Music appropriate for the occasion which blended with the color and charm of the "stained glass" originated from a radio-phonograph concealed behind the windows. Here, truly, was a combination of beauty embodying light, color and music. An interesting experiment with this unit demonstrated the spiritual reaction of the children who took part. Pupils and teachers of the Cook School were invited into the auditorium. It was cast into complete darkness. Silence! A switch was thrown and the "windows" diffused that darkness with soft light. Soft celestial music approached faintly then grew louder as the windows became brighter until it reached its crescendo, whereupon the "stained glass" shone brilliantly in all its glory! As the music subsided the light lost some of its brilliancy and gradually diminished as the music faded in

the distance. Another switch, and the house lights were on! There was no applause; none was needed. The atmosphere seemed sacred. The experiment was a success. As the pupils left the hall quietly, I overheard one boy tell another, "Gee! It's like being in church ain't it?"

Among the most outstanding and ambitious projects on display was a complete farm in miniature, with blossoming orchard which had been built by boys in an eighth grade. They will always remember Whittier's "Snowbound" because of this project. Without it, the boys might have been prone to sniff at poetry as being "sissy stuff".

The "Forty-Niners", a pioneer project, was tied up with American History study by pupils in a fifth grade. The children constructed covered wagons being drawn by oxen. "The procession set up on a sandtable against a mountainous background, effectively represented by heavy crumpled paper, stained and painted realistically, was a truly stirring achievement." The trek to the west by our pioneering ancestors was being re-enacted.

A large product map of the United States drawn on beaver-board, started in the classroom and continued during the exhibition was practically completed at the close of the exhibit. Upon completion, this map was shellacked and hung up in the classroom as an aid to future classes in the study of American products.

Model homes, Dutch and Indian villages and a complete dairy farm were among the many integrated projects represented in the work of the many school children.

"One Man Shows" were held for the outstanding boy and girl of the Senior Class in the Art Department at the High School. These same two young people were invited to exhibit their work at the New Bedford Woman's Club and

were sponsored by their organization as scholarship candidates. It is a source of satisfaction and deep pride to our community that one of our own boys, this same Robert Brooks, was awarded the first prize, a one year, full-time scholarship at the Vesper George School of Art in Boston in a state-wide, open competition of two hundred and eight students.

In promoting this exhibit the school children were requested to write invitations home to members of their families and the general public was invited through the press. The public did come and demonstrated that they were interested in what we were doing. The display rooms were crowded every session. More than two thousand parents, teachers, friends and classmates viewed the work of these young artists and craftsmen. It was very gratifying to see such an enthusiastic response and to hear the many complimentary reactions to the children's performances. It was their show but we, too, were glad to have had a part in it.

The Art Exhibit had a stimulating influence on the work of the classroom teachers, for they saw what could be and what was being done by their fellow-workers.

I wish to express my sincere appreciation to the parents, teachers, pupils and co-workers for their splendid co-operation in helping to make this successful event one of the highlights of the past year.

PERSONNEL

At the opening of the new school term this September, Mr. G. Philippe DeRosier took up his duties as Mechanical Drawing and Crafts instructor in the Art Department at the High School. He replaced Robert M. Whiting who resigned during the summer.

Miss Carolyn V. Baxter, serving as a substitute supervisor became a regular member of this department in September.

VISUAL AID

An S. V. E. slide projector was purchased with proceeds derived from a card party co-sponsored by this department and the music department. A portable screen and fifty miniature 2" x 2" Kodachrome colored slides were bought by the School Department. This modern equipment is a progressive step in the development of Art Appreciation and Picture Study.

STUDIO - WORKSHOP

A room in the basement of the Cook School was turned over to this department to serve as a studio-workshop. It fills a necessary need of long standing and provides a place to handle current projects, storing the exhibition frames, small sets of scenery, etc. Truly a workshop, for it was here that the Art Exhibit was prepared and assembled conveniently and efficiently because of its facilities.

RECOMMENDATION

There is a lack of suitable display space in many of our classrooms. What little space was originally provided in the newer school buildings has been rendered nearly useless by recent painting over the burlap surface making it hard and impractical. Teachers find it difficult to pierce it with pins. Celotex panels have proved so successful that a number of teachers, feeling the need of such space, not for art work alone, but for general purposes, have bought this material at their own expense. I recommend that this situation be given some consideration.

I regret Mr. Keith's illness has forced him into tempor-

ary absence from his duties as Superintendent of Schools. I wish to take this opportunity to thank him for his kindly advice, helpful guidance and sincere interest in the work of this department. It is our sincere wish that he may resume his duties in the near future.

In the meantime, Mr. Sadler, you as Acting Superintendent, may be assured of my personal co-operation and that of my co-workers whenever we can be of service.

I wish to acknowledge the friendly co-operation received from Miss Manseau, Mr. Egan and members of their respective staffs.

Respectfully submitted,

PAUL P. VANCINI

Report of the Director of the Department of Health and Hygiene

To the Superintendent,
New Bedford Public Schools,

Dear Sir:

I herewith present you my 1941 report of work in this department.

The Director has succeeded in examining all pupils in the morning kindergartens, all first, fourth and seventh grade pupils and all new entrants to all schools including the Senior High School. This makes approximately six thousand examinations made if we include those coming to the office for industrial certificates.

The latter number has increased in the last year owing to better labor conditions.

The appointment of another nurse, now giving us nine including the Supervisor, has brought up the efficiency of the department. More home visits have been made and more defects remedied.

The advancement of one of our staff to the Senior High School last year has proven of much worth this year.

I am happy to report that the Council of Women's Organizations was successful in arousing interest in the re-estab-

lishment of the Dental Clinics by the Board of Health in four of our schools and the childrens' teeth are receiving some attention at last. At the present time it is found that only the third grade pupils can be treated, so that as many more clinics could be used to advantage. Our nurses are instrumental in selecting those needing dental care.

It is especially encouraging to note that more parents have consulted the Director in regard to the health of their children. This of course consists only of advice and no treatment is given.

About thirty-five hundred pupils have had their hearing tested this year and if the mainspring of the audiometer had not broken about fifteen hundred more would have been done. Of the number examined about fifty will be added to the hard of hearing classes to receive lip reading instruction.

The Director has examined each year all candidates for the football squads and attended all local games of the Varsity team except one. Accidents have in the past few years been very slight probably due to the picking of the boys and the hardening process they receive from the coach.

The tuberculosis finding clinics have been held this year as usual with nearly three thousand pupils examined. A little over twelve hundred were X-rayed and this year only two frank cases of tuberculosis of the lungs found. These are being properly cared for by the Board of Health.

Respectfully submitted,

CHARLES W. MILLIKEN, M.D.

Report of the Grade Supervisor of Physical Education

Mr. Edward T. N. Sadler,
Acting Superintendent of Schools.

Dear Sir :

In compliance with your request I herewith submit a brief report of the Department of Physical Education in the grades.

During May and June many of the schools held a Festival Day either in the school hall or on the school grounds. Two of the schools combined and held their Festival at the Park. These Festival Days have been a part of our program for several years. We feel that it is a splendid community project bringing parents, friends, teachers and children together in a pleasant and educational way.

This fall has given us an unusual opportunity, with its pleasant days, to carry on our outdoor game program. The grammar grades participate in an organized game aimed to develop skill, alertness, team play, loyalty and a fair amount of endurance. The primary schools have carried through their program which is aimed to lay the foundation for the more advanced and organized games of the grammar grades.

Now that the cold weather has arrived the outside work will not be regular. The work inside is planned to build up a quicker response to directions, develop the body harmoni-

ously through systematic exercise, and in the grammar grades develop a better understanding of body mechanics and their application to everyday activities.

Our Folk Dance program, as ever, includes the fundamentals of the old Folk Dances of the world. Added to this, supplementary dances are correlated with history projects of different grades. The dance has always held an important place in the histories of the world.

The special corrective work in posture has been extended to some additional schools this year. It is my hope that in the very near future all schools will be able to carry on this program.

Many children need specific posture training. All children in this group are carefully examined to determine whether or not there is a health ailment directly responsible for their poor posture. Lack of rest, poor vision and many other conditions have a definite bearing on poor posture. Through the cooperation of school nurses and Dr. Milliken, the contributing causes, as far as possible, are removed. Parents are consulted in many cases and they are always most cooperative.

The teachers who have so generously given of their time to carry on this work have done a splendid job and I am deeply grateful to them.

I would like very much to go more thoroughly into the correction of flat feet. An experiment carried out some time ago gave a very pleasing evidence of correction. There is a great need for this branch of corrective work but at present, time does not permit an extensive program.

Now, as never before, the physical education of the children is of the greatest importance. Stronger bodies, more

alert minds, cooperative team play, loyalty and the correction of physical handicaps are the aims of our course in Physical Education.

With the addition of an assistant to the department last Spring, we have been able to give the teachers and children more help in the regular work. I would urge that another assistant be added at the earliest possible date, so that all teachers and all children may benefit. With this additional help I am sure our aims and ideals would be reached.

Respectfully submitted,

ELVA M. PARKER

Report of the Supervisor of Special Classes

Mr. Edward T. N. Sadler,
Acting Superintendent of Schools,
New Bedford, Mass.

Dear Sir:

In accordance with your request I herewith present the report of the Supervisor of Special Classes for the term beginning September, 1941.

The children in our special classes are those who have been poorly adjusted in school. They are characterized by a slow rate of development, and are very much limited in their mental ability and power to do abstract thinking and reasoning. When children of this type are expected to accomplish work beyond their mental power, failure and discouragement result. The purpose of the special class is to provide learning situations which are suited to the child's level and to his rate of learning ability so that he may experience the success and satisfaction that are due every child in his school life.

New Bedford, recognizing the needs of this type of child, in 1909 opened a class at the Sylvia Ann Howland School and one at the Thomas Donaghy School. Today we have seven special classes consisting of children from the ages of ten to sixteen with a diversity of mental ages and backgrounds. In a setup of this type there is a wide range in the chronological ages, intelligence, and grade ability of the group. The young retarded child needs a variety of play experiences which will lead to a desire to learn to read and

to the establishment of a good foundation in beginning reading and language.

Adolescents need vocational direction. They too must prepare to earn a living. It is impossible for one room to provide the variety of equipment needed with such a range of mental and chronological ages. With so great a diversity of interests and abilities, the most successful teacher finds it beyond the limits of her ability to meet the demands of such a varied group. Furthermore, we have sometimes felt that it is unfair to both teacher and pupil if a child is asked to remain in the same room for as long as six years.

Research studies of special class systems reveal that many cities have provided three or even four class ranges depending on the age and ability of the pupil. Thus a child is placed in a group most conducive to his individual needs with the possibility of adjustment from time to time as he attains certain stages of growth and development. In this way a pupil feels he is making continuous progress. I recommend, therefore, that for the present, we organize our special classes on at least two levels, pre-adolescent and adolescent. Progress from one class to another would depend on chronological age, mental ability, social interests, and physical maturity.

We have not a sufficient number of classes to care for the many children who have been tested by the Waverly Clinic and found unadjusted to the regular grades.

As the earliest age for admission to special classes in New Bedford is ten years, no provision is made for children between the ages of seven and ten who are working in the grades but who find it impossible to keep pace with normal children. As a result, at ten, some pupils have not only been much retarded, but also have established many unwholesome work habits and attitudes. Making provision for the growing

number of these children is a problem we shall have to face in the near future.

In closing I wish to express my deep appreciation to those members of the School Department who have so generously helped me these past three months in my new responsibilities.

Respectfully submitted,

ALICE M. IRWIN

ANNUAL REPORT

of the

COMMISSIONER

of

PUBLIC WORKS

of the

CITY OF NEW BEDFORD, MASS.

to the

CITY COUNCIL

1941

REYNOLDS PRINTING
New Bedford, Mass.
1942

COMMISSIONER'S REPORT

February 18, 1942

To the Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen :

I submit herewith my annual report of the operations of the Department of Public Works for the year ending December 31, 1941.

Appropriations and expenditures for the entire year are shown in the various appended tables, together with a chart giving the comparative Highway expenditures covering the period from 1921 to 1941 inclusive.

STREET REPAIRS — Along with our general maintenance work, it was possible to reconstruct two streets that were badly in need of repair: Cottage Street, Parker to Sycamore; Sawyer Street, County to Summer. A substantial sum should be allocated for a street reconstruction program if our streets are to be kept in proper physical condition.

BRIDGE REPAIRS — The Coggeshall Street Bridge was completely replanked, a Warcolite surface applied over the timbers, and all steel work repainted. No major repairs should be needed for some time.

SEWAGE DISPOSAL — The cleaning of the Main Interceptor Tube was started this year. The tube has been in operation approximately 25 years and has never before been cleaned. A similar appropriation of \$1,000 per year over a period of from five to six years will enable us to complete cleaning the entire length and thereby increase its efficiency.

I take the opportunity at this time to express my appreciation for the co-operation I have received from His Honor the Mayor, members of the City Council, the various Department Heads, and my own faithful assistants in carrying on the work of this Department.

Respectfully submitted,

PATRICK J. FOLEY,

Commissioner of Public Works.

CITY OF NEW BEDFORD, MASS.

OFFICE OF THE NEW BEDFORD WATER BOARD

JANUARY 1, 1942

*To the Mayor and City Council
of the City of New Bedford:*

Gentlemen:

In compliance with Section 91 of the City Ordinances, the New Bedford Water Board herewith presents its seventy-second annual report; it being for the year ending December 31, 1941.

The reports of the Water Registrar and Superintendent are incorporated with and accompanying it as usual.

The Water Registrar's report gives in detail the financial operations, and that of the Superintendent, details of the physical operations of the Department for the year.

The term of Mr. Frank Simas expired in June 1941, and Mr. Edward V. Lahey was named by the Mayor and confirmed by the Council as a member of this Board to succeed Mr. Simas.

Mr. Carl Pollock and Mr. Lionel LeDuc were dismissed by the Mayor as members of the Water Board on May 20, and the Mayor's dismissal was approved by the City Council on May 22. The Mayor nominated Mr. Arthur W. Bradbury for a term ending in June 1943 and Mr. Benjamin F. Proud for a term ending in June 1942. The City Council confirmed these appointments on June 12, 1941. The new Board organized on June 20 and elected Howard C. Mandell as Temporary Clerk of the Water Board and Temporary Superintendent of the Water Department pending the establishment of an eligible list under Civil Service regulations.

Your Board has faced the problem of providing satisfactory water service during a period of rapidly expanding industrial activity. The consumption of water for the last six months of 1941 was 12½% greater than that for the first six months; that for the year 1941 was the greatest in the history of the city with the exception of a short period in the year 1922.

Owing to the financial condition of the city, the Board has felt in duty bound to cooperate in the reduction of expenses and has made every endeavor to provide the best possible water service within these limitations.

For the year 1941, the Water Department expenditures for operation, management, repairs and extensions amounted to \$170,156.03 which is much lower than at any previous time when the usage of water has been comparable. Corresponding expenditures for the year 1922 when the consumption was about the same as for the year 1941, amounted to \$336,573.42.

The following employees have retired under the provisions of Chapters 318 and 400 of the Acts of 1936:

Name	Position	Date of Retirement	Length of Service
Thomas Beaton	Laborer	March 31, 1941	19 yrs. 10 mos.
Hugh L. Donaghy	Blacksmith	June 6, 1941	9 yrs. 2 mos.

With the development of the national emergency, the Board instituted prompt and effective measures against sabotage by excluding all unauthorized persons from Water Works properties and by providing guards at certain points where sabotage might interrupt continuous maintenance of supply. The guards were placed under the direction of the Chief of Police. In line with this policy, fishing permits were issued only to owners of property abutting the ponds under our control and no permits for fishing through the ice were issued.

Five old buildings on the water shed were turned over to the City Property Committee for disposal by sale at public auction and the proceeds were returned to general funds.

The metal contained in the old and useless pumping equipment and boilers at the Purchase Street Pumping Station was sold at public auction to the highest bidder in order that the material might become available for the production of steel for defense purposes.

Three parcels of land in Middleboro formerly owned by the Estate of Arthur Winslow which contained in all 144 acres with building, were purchased from Edward J. Dunn for the sum of \$10,000 from the Additional Supply Account, Chapter 400, Acts of 1924. The balance now remaining to this account is \$2,888.82.

It became apparent in August that a supplementary appropriation would be necessary to complete the operations of the department for the year. \$13,000 was raised through the sale of Tax Title Bonds for this purpose.

The Board was unable to grant a number of petitions for the extension of main pipe during the year because of a lack of funds.

It was deemed advisable to maintain a storage of coal sufficient for about six months operation in the coal shed at Quittacas Pumping Station and this policy has been adopted.

The following abstract from the Water Registrar's report shows in condensed form the financial operations of this department during the year. Full details will be found in his report, which accompanies this.

FIRST, BASED ON THE BUDGET SYSTEM, IN
ACCORDANCE WITH CITY AUDITOR'S ACCOUNT

	Salaries & Wages	General Expense	Outlay	Total
1941 Budget Appropriation	\$115,089.75	\$55,903.00	\$300.00	\$171,292.75
1942 Expenditures	114,486.18	55,379.95	289.90	170,156.03
Balances Dec. 31, 1941	603.57	523.05*	10.10	1,136.72
Overlay from Bond issue to 1942 Budget & Encumbrances Acct.				1,126.62
Un-expended balance				10.10

* This amount set aside in City Auditor's for encumbrances—
Goods ordered in 1941, delivery to be made in 1942.

SECOND, BASED ON RECEIPTS AND EXPENDITURES

Receipts

For water, meter rentals, demands and charges	\$374,525.08
Miscellaneous Receipts	11,743.64
Total Receipts	\$386,268.72

Expenditures

Management and repairs	\$158,105.90
Interest	35,897.50
Bonds	80,000.00
Extensions	12,050.13
	\$286,053.53
Balance reverting to General Funds 12/31/41	\$100,215.19
The total outlay for the construction of these works exclusive of debt, interest, management and repairs through 1940 was	\$6,945,770.48

INCREASE

	Payments	Credits	Net	
Distribution	\$12,050.13	\$5,157.85	\$6,892.28	\$6,892.28
Net cost of works 12/31/41				\$6,952,662.76

The following is a statement of receipts and expenditures for the past eleven years.
RECEIPTS AND EXPENDITURES SINCE 1930

Year	Receipts for Water	Total Receipts	Maintenance Interest and Bonds	Extensions Paid from Regular Receipts	Extensions Paid from Bond Account	Returned to General City Funds	Total Expenditures	Balance 1st of Year

† Includes \$380,000 from Bond Issue for PWA projects

Coal has been purchased under the contract between the Clerk of Committees and David Duff & Son. The original price of \$6.25 per 2000 lbs. f.o.b. cars, New Bedford, was increased after Oct. 1, 1941 to \$6.77 per 2000 lbs.

The following are the principal contracts made by this Board during the year.

Date 1941	Contractor	Supply	Consideration
Feb. 12	Darling Valve & Mfg. Co.	3 Hydrants 4—8" Gate Valves 2—4" Gate Valves 1—2" Gate Valve	\$62.12 each 37.40 each 14.52 each 8.36
Feb. 13	Plumbers' Supply Co.	Copper Tubing & Fittings	\$416.59— 2%—10 days
Feb. 24	Hersey Mfg. Co.	1—2" Meter with self contained fish trap 2—1½" meters ditto	\$78.00 \$40.00 each
Feb. 24	National Meter Co.	1—4" Meter with fish trap 1—3" meter ditto	\$250.00 \$145.00
Feb. 28	Johns-Manville Sales Corp.	8" Transite Water Pipe Class 150	\$1.02 per foot 2%—10 days
Mar. 14	Babbitt Steam Specialty Co.	2—3½" Lunken- heimer Safety Valves	\$77.70 each 2%—10 days
Apr. 18	National Meter Div. Pittsburgh Equitable Meter Co.	1—4" Meter with fish trap 1—3" Meter with fish trap	\$250.00 \$145.00
Apr. 28	Joseph Z. Boucher	Automobile insurance	\$239.70
June 20	Hersey Mfg. Co.	25—¾" Hersey Disc. Meters	\$17.32 each \$1.50 allowance for old meter tur- ned in against two new meters purchased 2%—10 days
Aug. 1	J. F. St.Aubin Co.	Repairs to House of Pumping En- gineer Wall Paper, Painting & Pap- ering, Installing ceilings	 \$65.26 \$550.00 \$250.00

Date 1941	Contractor	Supply	Consideration
Aug. 1	Chas. S. Ashley & Sons, Inc.	Boiler insurance	\$211.75
Aug. 1	Francis H. Murray	Automobile insurance	\$400.99
Aug. 1	A. E. Coffin Press	33,000 Water Bills	\$3.08 M.
Aug. 1	A. E. Coffin Press	500 Copies Annual Report	\$177.50
Oct. 29	Chapman Valve Mfg. Co.	120 Flat Sheets	
Nov. 4	A. E. Coffin Press	2 O.S. Stems & B. M. Discs	\$76.00 each
Nov. 4	Darling Valve & Mfg. Co.	20,000 Meter Record Cards	\$180.75
Nov. 4	Darling Valve & Mfg. Co.	4—4" Darling Hydrants	\$68.35 each
Dec. 4	Neptune Meter Co.	1—4" Trident Disc Meter	2%—10 days \$240.00
Dec. 8	American Smelting & Refining Co.	Lead Pipe	\$8.10 per C lbs.
Dec. 8	Greene & Wood Inc.	130 Creosoted Railroad ties	\$2.23 each
Dec. 18	N. B. Gas & Edison Light Co.	Replacing 6 poles	\$221.00
Dec. 24	C. F. Wing Co.	"TRIPLEX" blackout shades	\$157.00
Dec. 29	Curtis 1000, Inc.	35,000 window envelopes	\$2.98 per M

We wish to express our appreciation for your cooperation in the work of this department during the year.

Respectfully submitted,

Matthew A. Glynn, Mayor
Edward V. Lahey,
Arthur W. Bradbury,
Benjamin F. Proud,

New Bedford Water Board

REPORT OF THE WATER REGISTRAR

CITY OF NEW BEDFORD,

WATER REGISTRAR'S OFFICE,

December 31, 1941

To the New Bedford Water Board:

Gentlemen:—

I herewith present to you a detailed statement of the receipts and expenditures of the Water Works Department for the year ending December 31, 1941.

The report is based on Budget vs. Expenditures and also on Receipts and Expenditures as previously.

First, Based on Budget System

RECEIPTS

Original Budget Appropriation	\$155,733.75	
Additional	2,500.00	
Supplementary appropriation Bond Issue	13,000.00	
Insurance rebate and Gas Tax Refund	59.00	
	<hr/>	\$171,292.75

EXPENDITURES

Bills	\$55,669.85	
Payrolls	114,486.18	
	<hr/>	170,156.03
		<hr/>
		1,136.72
Overlay from Bond Issue to 1942 Budget		1,126.62
		<hr/>
Balance Dec. 31, 1941		\$10.10

Second, Based on Receipts and Expenditures as Previously

RECEIPTS

Rates		
Under 10,000 cu.ft. per quarter		\$181,641.93
Over 10,000 and less than 100,000 cu.ft. per quarter		33,204.26
Over 100,000 and less than 1,000,000 cu.ft. per quarter		68,791.04
Over 1,000,000 and less than 2,000,000 cu.ft. per quarter		27,800.70
Over 2,000,000 cu.ft. per quarter		33,001.70
Estimated and building purposes		3,301.21
		<hr/>
Total receipts for water		347,740.84

REPORT OF THE SUPERINTENDENT

NEW BEDFORD WATER WORKS,

SUPERINTENDENT'S OFFICE,

January 2, 1942.

To the New Bedford Water Board:

GENTLEMEN:—The seventy-second annual report of your Superintendent, covering the calendar year 1941, is herewith respectfully submitted.

Through the courtesy of Mr. Arthur D. Weston, Chief Engineer of the State Department of Public Health, the results of monthly analyses of water from the Lakeville Ponds, our source of supply, are incorporated in this report. These show that the quality of the water continues to be excellent.

Copies of the rainfall records at Quittacas Pumping Station in Rochester and at the Old Storing Reservoir in Acushnet are appended:—also the usual tables showing in detail the work of the department for the year.

The rainfall at Little Quittacas Station for the year was 39.57 inches. This is 12.65 inches less than last year and 5.78 inches less than the average for the past 47 years.

POND ELEVATIONS

Although our consumption during September averaged more than eleven million gallons per day, and practically no rain fell during the month, there was no noticeable depletion of storage in the ponds. Because of the generous excess yield of these ponds above our present requirements, we were not affected by the severe drought which caused many New England communities to curtail the normal use of water.

Comparison of the elevations given below with those for the past forty years shows that they were about average.

The water level in Pocksha Pond has varied from 51.82 on March 26th to 48.84 on December 10th. The present elevation is 49.12. The average for the year was 50.03.

In Great Quittacas Pond, the water level has ranged between 50.87 on February 12th and 48.75 on December 10th. The present elevation is 49.04. The average for the year was 50.00.

The water level in Little Quittacas Pond is controlled by a gate in the connection to Great Quittacas Pond, and, in accordance with the practice of several years, has been kept low in order to improve drainage from the swamp at the northerly end of Little Quittacas Pond. The average elevation for the year was 47.76, the highest level 48.25, and the lowest level 47.44.

FORESTRY

Weeding and pruning operations have been carried on as far as practicable with the force of men available. There remains on the water shed two hundred or three hundred cords of wood, some of which is cut in cord lengths and stacked, the remainder in the form of logs lying on the ground. Disposition of this wood, through sale, or delivery to the Welfare department of the City is recommended to forestall spoilage through rotting.

We received, under date of December 12, 1941, from Mr. Guy W. Lucas, District Forester of the Massachusetts Department of Conservation, certain recommendations following an examination of our water shed by Mr. Lucas. It appears from his report that there are certain stands on the water shed which would be improved by selective cutting of mature trees. It is suggested that some arrangement be made for the sale of such timber during the year 1942.

The following buildings were turned over to the City Council, and sold by that body at public auction: Baylies boat house; Perkins barn; small cottage and out building on Josephine P. White property; shack on George White property; summer cottage on Obed Allen property.

QUITTACAS PUMPING STATION

The engines and boilers at this station continue to operate satisfactorily with little expense for repairs.

With the advent of the National Emergency, this station was closed to the public, and effective measures were taken to protect it against sabotage.

The lining of the Babcock and Wilcox boiler, which has been in use for six years, will require replacement during 1942.

FORCE MAINS

Both force mains have been in use during the year, and no important repairs have been necessary.

RAILROAD

About two hundred new creosoted ties, and about one hundred locust ties, cut and trimmed by our forces, have been installed during this year.

ENGINEER'S HOUSE

The interior of the chief engineer's house was painted and papered, and new ceilings were applied to the first floor rooms, under a contract performed by J. F. St. Aubin Co.

OLD ACUSHNET SYSTEM

This system, including the Acushnet Storing Reservoir, Receiving Reservoir, and the Mt. Pleasant Reservoir, remains intact.

The original McAlpine pumping engine installed in 1869, the Worthington duplex pump installed in 1881, and the old Belpaire boiler and auxiliary piping and equipment, were sold to the General Scrap Metal Company, under a contract, and have been completely demolished and removed. There is now no pumping equipment in the Purchase Street Pumping Station. The entire premises enclosed by the wire fence, have been leased to Smith Bros., Inc., for a term of five years and a rental of \$50.00 per month.

DISTRIBUTION SYSTEM

Thirteen hydrants have been broken off by skidding or carelessly driven automobiles. The cost of repairing them was \$710.51, of which \$471.27 has been reimbursed by the owners or their insurance companies. This does not include the cost of water wasted through these breaks, which is quite an item.

Eight inch Transite, Class 150, cement asbestos pipe, was laid in Van Buren Street from Summer Street to Myrtle Street, and in Myrtle Street, from Van Buren Street to Fillmore Street. This is the first Transite pipe purchased by this department. We found it less expensive to buy and easier to install than cast iron pipe, and see no reason why we can not expect an equivalent length of satisfactory service from it. This work, including the installation of hydrants, gate valves, service pipe, and meters, was done under an agreement with the New Bedford Housing Authority. The bill remains unpaid. We are informed that no payment will be made to the City of New Bedford until all work of whatever nature covered by the agreement, and including street work, has been completed.

LEAKS

There have been twelve leaks on main pipe during the year, as herewith shown:

Date	Size	Location	Cause	Cost
Jan. 9	8"	Kilburn St., 16' E. x W. line Belleville Ave.	Joint Leaking	\$23.02
Feb. 18	8"	Kempton St., E. line x Newton St.	Joint Leaking	32.56
Apr. 23	20"	So. Sixth St., 50' S. x Wing St.	Joint Leaking	20.81
June 17	8"	Prospect St., at ft. of Howland St.	Broken Main	60.25
June 20	6"	Acushnet Ave., Intersection x Grinnell St.	Joint Leaking	27.82
July 7	1"	Branchaud Court	Leak in Main	48.35
July 12	6"	238 Coffin Ave.	Joint Leaking	24.70
July 31	8"	So. Second St., 100' S. x Division St.	Joint Leaking	25.22
Aug. 11	8"	Hillman St., S. W. Cor. No. Water St.	Joint Leaking	77.24
Aug. 23	8"	Weld St., 20' S. x Ashley Blvd.	Joint Leaking	21.72
Nov. 3	6"	Frederick St., 415' W. x Rodney French Blvd. (East)	Joint Leaking in 6" Hydrant Pipe	25.15
Dec. 23	6"	Blackmer St., 70' W. x So. Second St.	Joint Leaking	23.81

224 feet of distribution pipe (less than 4") have been laid. The total length now in use is 9,478 feet.

Seven new stop gates have been set and two of those previously set removed. The total number now in use is 2,959.

Three small size gates have been set and none of those previously set has been removed. The total number now in use is 88.

Total number of waste gates now in use is 207.

Total number of air taps now in use is 218.

Fourteen private stop gates have been set and one of those previously set has been removed. The total number now in use is 730.

Six hydrants have been set and none of those previously set has been removed. The total number now in use is 1,925.

Total number of water cart hydrants now in use is 31.

Total number of sprinkler cart hydrants now in use is 8.

Sixty-nine service pipes have been laid and thirteen of those previously laid have been removed. The total number now in place is 19,623. Of this number, two hundred seventy-seven are unmetered fire services, seventeen thousand four hundred thirty are metered, and the balance, one thousand nine hundred sixteen are not in use.

Five hundred ninety-nine taps have been cleaned as follows:

Rust 562; trouble inside 37,;

in addition to several hundred calls in response to complaints and requests for investigation.

One thousand eight hundred thirty-four meters have been removed for repairs, and one thousand eight hundred forty-one have been reset. Also sixty-four new meters have been set for the year, making the total number now in use 17,430.

CONSUMPTION OF WATER

The consumption of water for the year has been as follows:

Month	Monthly Consumption				Daily Average Consumption
	New Bedford	Dartmouth	Acushnet	Total	
	Gallons	Gallons	Gallons	Gallons	
1941					
January	278,772,810	5,724,750	3,349,500	287,847,060	9,285,389

Averages				317,589,148	10,434,375

Maximum daily consumption—(24 hrs.) September 16, 1941*.....14,674,526

Minimum daily consumption—(24 hrs.) July 4, 1941.....6,679,500

Average daily consumption—6 A. M. to 6 P. M.....6,376,577

Average night consumption—6 P. M. to 6 A. M.....4,057,798

*Flushing 48" Main at Beaver Dam.

Amount of water consumed shown on above table includes the supplying of about 54.95 miles of distribution pipes located in the adjoining towns of Dartmouth and Acushnet. Dartmouth supplies 8265 consumers, of which 295 are summer residents, through 1653 taps. Acushnet supplies 3525 consumers through 653 taps.

COMPARISON OF THE CONSUMPTION OF THE YEAR 1941 WITH THE
RECORD OF THE 60 PREVIOUS YEARS.

Year	Estimated Population	Estimated number of consumers	Number of taps	Total number of gallons consumed	Average daily consumption	Gallons per day to each inhabitant	Gallons per day to each consumer	Gallons per day to each tap	Number of meters
1882	28,500	20,424	4,203	859,119,622	2,326,352	82	114	553	41

*Includes population supplied in towns of Dartmouth and Acushnet 2,306 taps, 11,790 consumers.

‡This consumption is for eleven months.

†This consumption is for thirteen months.

CONSUMPTION

The average daily consumption, based on the calendar year, was 10,434,375 gallons, which is about 10% more than last year. The consumption for the first six months of the year was substantially the same as that for the previous year. In July of 1941, however, a decided increase in the use of water for industrial purposes began, so that the average daily consumption for the last six months of the year was 10,987,029 gallons, which is equal to the highest sustained consumption we have ever supplied.

Based on the period from July 1, 1940 to June 30, 1941, which is the time all meter readings are available, meters accounted for 90% of all water pumped.

Slippage of meters, leakage, water wasted through broken hydrants, flushing mains, water used for fires, testing and replacing evaporation in Mt. Pleasant Reservoir, account for the remainder.

The following table shows the number of accounts, registration, and income in the various steps of the sliding scale of water rates, based on the same period.

DATA ON METERED CONSUMPTION AND REVENUE
 July 1, 1940 Through June 30, 1941.
 (All Active Service Except Fire Supplies Metered)

	No. of Accts.	Number of Gallons			Receipts for Metered Water		
		Total	Per		Total	Per Account	Per 1,000 gallons
			Account	Per day Per Acct.			
Using less than minimum rate viz.— 33,333 1/3 gals. per year	4,057	83,077,500	20,478	56	\$19,992.89	\$4.93	\$.24
Using over minimum rate but less than 75,000 gals. per quarter	12,759	1,066,530,750	83,590	229	160,444.40	12.57	.15
Using between 75,000 and 750,000 gals. per quarter	349	234,352,250	671,494	1,837	32,462.25	93.01	.138
Using between 750,000 and 7,500,000 gals. per quarter	98	605,273,250	6,176,258	16,919	67,101.93	684.71	.11
Using between 7,500,000 and 15,000,000 gals. per quarter	6	224,251,000	37,375,166	102,398	22,081.72	3,680.29	.098
Using over 15,000,000 gals. per quarter	4	993,514,500	248,378,625	680,489	28,871.86	7,219.47	.029
Totals and Averages	17,273	3,206,999,250	185,665	509	\$330,955.05	\$19.16	\$.103
Metered Consumption by Water Department		28,397,021					
		3,235,396,271					

An analysis of the table showing receipts and expenditures since 1930 shows that less money was expended for the water system in 1941 than for any other year since 1931. This was true in spite of the fact that more water was supplied in 1941 than in any year since 1923.

The following figures show the comparative expenditures for maintenance, bond and interest payments, and the average daily consumption for the years stated:

	Expenditures Maintenance, Bonds & Interest	Average Daily Consumption
1922	\$366,516.98	10,792,111 gallons
1932	320,452.35	8,963,159 "
1941	274,003.40	10,434,375 "

These figures show that the cost of supplying an average of one million gallons per day cost \$34,000 in 1922, \$35,700 in 1932, and \$27,000 in 1941.

The average cost of supplying one million gallons, based on expenditures for maintenance, operation, and bond and interest payments, was \$70.17 for the year 1941, which compares with an average cost of \$91.62 for the past ten years.

Based upon the cost of maintenance and operation only, the average cost of pumping one million gallons has fallen from \$57.42 in 1921 to \$39.75 in 1941, the total amount of water pumped for the two years being approximately the same.

The present Board and personnel of the department have cooperated to the fullest extent to make possible the substantial savings indicated above.

Respectfully submitted,

HOWARD C. MANDELL,
Superintendent.

Totals	69	1777	1150

Five 2 inch cast iron services have been removed and replaced with 2 inch copper service.

One ¾ inch light lead service has been removed and replaced with ⅝ inch heavy lead service.

One ⅝ inch light lead service has been removed and replaced with 1 inch heavy lead service.

Six ⅝ inch light lead services have been removed and replaced with ⅝ inch heavy lead services.

One ½ inch heavy lead service has been removed and replaced with 1 inch heavy lead service.

Three ½ inch heavy lead services have been removed and replaced with ⅝ inch heavy lead services.

One ¾ inch connection has been made to services previously laid by the City.

Six services have been extended by the City using 153½ feet of pipe.

One ⅝ inch heavy lead service, one ⅝ inch light lead service, two ¾ inch heavy lead services, and nine ½ inch heavy lead services have been removed.

Length of service pipe laid during the year 3,085 ft.

Number of services laid in 1941

Number of services removed

SUMMARY OF STATISTICS.

FOR THE YEAR ENDING DECEMBER 31, 1941.

IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION.

NEW BEDFORD WATER WORKS.

NEW BEDFORD,
BRISTOL COUNTY, MASS.

GENERAL STATISTICS.

Population by census of 1941—110,341.

Date of construction, 1866 to 1869, inclusive. Further supply,
1895 to 1899, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869. From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take 11½ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6-10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distant, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch steel force mains 8¼ miles long to a distributing reservoir (capacity 67 million gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir it flows into the city's distributing system by gravitation through two 36-inch cast iron pipes averaging 4 1-17 miles in length.

It is also possible to pump directly to the city through a 48" and 36" main using either reservoir as a balance. This latter connection was completed in 1922.

The first named system is not now in use, but is held in reserve to meet any emergency which might occur.

PUMPING STATISTICS

1. Builders of Pumping Machinery.

Purchase Street Station:

a. McAlpine engine,
built by Quintard Iron Works. Cap. 5,000,000 gals. per 24 hrs.

b. High duty engine,
built by Henry R. Worthington Cap. 5,000,000 gals. per 24 hrs.

Little Quittacas Station:

a. b. Leavitt engines in duplicate, Capacity of the two engines
built by Dickson Mfg. Co. 20,000,000 gallons per 24 hrs.

c. DeLaval electrically operated centrifugal pump, directly connected with a General Electric squirrel cage type I. Form K. 3 phase, 60 cycle, 550 volt, 250 H. P., induction A. C. motor, operating at about 1800 revolutions per minute, built by DeLaval Steam Turbine Co. Current purchased of New Bedford Gas and Edison Light Co. Capacity about 6,000,000 gals., delivered into High Hill Reservoir in 24 hours.

LITTLE QUITTACAS STATION—Engines A and B.

2. Description of fuel used.

a. Kind—bituminous.

b. Brand of coal—Pocahontas.

c. Price of coal per net ton—delivered Little Quittacas Station \$7.57.

d. Percentage of ash—7.9%.

e. Wood, price per cord—none used.

3. Coal consumed for the year—4,362,453 lbs.

4. (Pounds of wood consumed) ÷ 3—equivalent amount of coal—none used.

5. Total equivalent coal consumed for the year=(3)+(4)
4,362,453 lbs.

6. Total pumpage for the year—3,566,424,856 gallons with 4.8% allowance for slip.

7. Average static head against which pumps work—167.68 feet.

8. Average dynamic head against which pumps work—177.87 feet.

9a. Number of gallons pumped per pound of equivalent coal (5)
817.

9b. Number of gallons raised 100 feet per pound of equivalent coal (5) 1,453.

10. Duty = $\frac{\text{gals. pumped (6)} \times 8.34 \text{ (lb. x 100 x dynamic head (8))}}{\text{Total fuel consumed (5)}} = 120,000,000$

10b. Cost per million gallons raised into High Hill Reservoir (engines A. and B.)=\$14.38.

LITTLE QUITTACAS STATION—Engine C.

11. Total pumping time for the year 1,039 hrs. 28 min.
12. Total current used for the year 235,900 K.W.H.
13. Total pumpage for the year 244,087,920 gallons.
14. Number of gallons pumped per K.W.H. 1,035.
15. Number of K. W. H. required to raise one million gallons into High Hill Reservoir 967.
Cost per K. W. H. varies in accordance with amount consumed.
16. Average cost per K. W. H. \$.0179.
17. Cost per million gallons raised into High Hill Reservoir, (Engine C only) \$19.24.

Total cost of pumping, figured on pumping station expenses, viz: \$55,981.97.

18. Per million gallons pumped \$14.69.
19. Per million gallons raised one foot (dynamic)—8.2 cents.

Cost of pumping figured on total maintenance and interest on bonds, (see financial CC+DD) less credits, viz: \$187,417.61.

20. Per million gallons pumped \$49.19.
21. Per million gallons raised one foot (dynamic)—27 cents.

Cost of pumping figured on total maintenance, interest on bonds and bond payments (see financial CC+DD+EE) less credits, viz: \$267,417.61.

22. Per million gallons pumped \$70.18.
23. Per million gallons raised one foot (dynamic)—39 cents.

STATISTICS OF CONSUMPTION OF WATER

CITY ORDINANCE

Regulating Traffic

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Forty-one

AN ORDINANCE

Limiting Traffic to ONE WAY in Certain Streets

WHEREAS, the deferred operation of this ordinance would tend in part to defeat its purpose, therefore it is hereby declared to be an emergency ordinance, in accordance with the provisions of Section 20 of Chapter 43 of the General Laws (Ter. Ed.), necessary for the immediate preservation of the public health, safety and convenience.

Be it ordained by the city council of the City of New Bedford as follows:—

SECTION 1. An Ordinance Regulating Traffic upon the Public Streets of the City of New Bedford, adopted December 27, 1929, and approved by the Department of Public Works on January 14, 1930, as amended, is hereby further amended by striking out in Section 35 of Article VII the paragraphs numbered (1), (6), and (12), and inserting in place thereof the following new paragraphs, viz:—

- (1) ELM STREET, from North Water Street to County Street, westerly
- (6) NORTH STREET, from North Water Street to Kempton Steet, westerly
- (12) WILLIAM STREET, from County Street to North Water Street, easterly

SECTION 2. Section 35 of Article VII of said Ordinance Regulating Traffic upon the Public Streets of the City of New Bedford, as amended, is hereby further amended by adding at the end thereof three new paragraphs which shall read as follows:—

- (15) WALNUT STREET, from South Front Street to County Street, westerly
- (16) SCHOOL STREET, from County Street to Purchase Street, easterly
- (17) HIGH STREET, from North Water Street to County Street, westerly

SECTION 3. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY ORDINANCE**Special Police Officers****CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Forty-one

AN ORDINANCE

Relative to the Appointment and Jurisdiction of SPECIAL POLICE OFFICERS and Authorizing the use of Regular and Reserve Members of the Police Department for Certain Outside Employment

Be it ordained by the city council of the city of New Bedford as follows:—

SECTION 1. Sections 413, 414, 415 and 416 of the Revised Ordinances of 1916 are hereby repealed and the following inserted in place thereof.

Section 413. Special police officers may be nominated by the Mayor, subject to confirmation by the City Council, for the protection of property or any factory, mill or theatre. Only citizens of the United States shall be eligible for appointment as such special police officers.

Section 413a. The City Clerk shall prepare a form of application for appointment as special police officers to serve without pay from the city, and a license to be issued upon appointment. Said application shall be written out by the person seeking the appointment and shall state his age, education, employment for the five years next preceding the date of application, present employment, citizenship, police record, if any, and the purpose for which the appointment is desired.

Section 413b. The City Clerk shall refer said application to the Chief of Police, who shall report to the City Clerk upon the fitness of the person involved, and the necessity for such appointment.

Section 414. Said appointment shall be for the term of one year unless sooner revoked or cancelled and it may be revoked by the city council, with the approval of the Mayor, without hearing.

Section 414a. No special police officer shall serve or be employed in such capacity at any place other than the one mentioned in his application and a violation of this provision shall be sufficient cause for immediate revocation. Employers must immediately notify the Chief of Police of the resignation or dismissal of any person who was appointed a special police officer at their request, and said person shall immediately surrender to the City Clerk his license and badge. Special police officers are hereby prohibited from wearing or displaying any badge other than the one issued by the City Clerk and also from wearing any uniform or equipment tending to create the impression that they are members of the Police Department.

Section 415. All police work at dances, carnivals, circuses, athletic exhibitions, amusement parks or at any other public gatherings conducted by persons or organizations to which an admission is charged shall be performed either by members of the reserve force or by members of the regular force of the police department, not on actual duty. All compensation for such services shall be paid by the person or organization conducting the event and shall be retained by the officer or officers performing the same.

Section 416. Assignments to the aforesaid work shall be equitably distributed by the Chief of Police with the approval of the Mayor. In cases of extreme emergency when the supply of regular and reserve police officers is not sufficient to cope with the emergency, the Chief of Police may recommend and the Mayor appoint temporary reserve police officers for the duration of the emergency, in accordance with the rules and regulations of the Civil Service Commission.

SECTION 2. All ordinances or parts of ordinances, all rules and regulations or parts of rules and regulations inconsistent herewith are hereby repealed, annulled and rescinded.

SECTION 3. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

Creating ROTARY TRAFFIC at NEW BEDFORD-
FAIRHAVEN BRIDGE

WHEREAS, the deferred operation of this ordinance would tend in part to defeat its purpose, therefore it is hereby declared to be an emergency ordinance, in accordance with the provisions of Section 20 of Chapter 43 of the General Laws (Ter. Ed.), necessary for the immediate preservation of the public health, safety and convenience.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. An Ordinance Regulating Traffic upon the Public Streets of the City of New Bedford, adopted December 27, 1929, and approved by the Department of Public Works on January 14, 1930, as amended, is hereby further amended by striking out in Section 35 or Article VII the paragraphs numbered (8), (11), and (18), and inserting in place thereof the following new paragraphs, viz.:—

- (8) SECOND STREET, from HIGH STREET to COVE STREET, southerly.
- (11) WATER STREET, from COVE STREET to HOWLAND STREET; and from SPRING STREET to the southerly line of HIGH STREET, northerly.
- (18) MIDDLE STREET, from PURCHASE STREET to FRONT STREET, easterly.

SECTION 2. Section 23(c) of Article VI of said Ordinance Regulating Traffic upon the Public Streets of the City of New Bedford, as amended, is hereby further amended by adding at the end thereof four new paragraphs which shall read as follows:—

- (137) RODMAN STREET, north side, from Front Street to North Water Street.
- (138) HIGH STREET, both sides, from North Water Street to Second Street.
- (139) MIDDLE STREET, north side, from NORTH WATER STREET to SECOND STREET.
- (140) SECOND STREET, east side, from Middle Street to High Street.

SECTION 3. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).
